

REPORT
OF THE
MINISTER OF JUSTICE
AS TO
PENITENTIARIES OF CANADA
FOR THE
YEAR ENDED JUNE 30
1904

PRINTED BY ORDER OF PARLIAMENT

OTTAWA

PRINTED BY S. E. DAWSON, PRINTER TO THE KING'S MOST
EXCELLENT MAJESTY

1905

To His Excellency the Right Honourable Sir Albert Henry George, Earl Grey, Viscount Howick, Baron Grey of Howick, in the County of Northumberland, in the Peerage of the United Kingdom and a Baronet ; Knight Grand Cross of Our Most Distinguished Order of Saint Michael and Saint George, &c., &c., Governor General of Canada.

MAY IT PLEASE YOUR EXCELLENCY :

I have the honour to submit herewith, for the information of Your Excellency, the Annual Report of the Inspectors of Penitentiaries for the Year ended June 30, 1904.

I have the honour to be,

Your Excellency's most obedient servant,

C. FITZPATRICK,
Minister of Justice.

DEPARTMENT OF JUSTICE,

OTTAWA, January 19, 1905.

INSPECTORS' REPORT

ANNUAL REPORT
OF
INSPECTORS OF PENITENTIARIES
FOR THE
FISCAL YEAR 1903-4.

To the Honourable
CHARLES FITZPATRICK, K.C.,
Minister of Justice.

SIR,—We have the honour to submit herewith reports and statistics in connection with the penitentiaries and territorial jails of Canada for the fiscal year ended June 30, 1904.

POPULATION.

The average daily population of the penitentiaries for the past ten years has been as follows —

1894-5	1,250
1895-6	1,314
1896-7	1,353
1897-8	1,415
1898-9	1,447
1899-0	1,430
1900-1	1,405
1901-2	1,294
1902-3	1,224
1903-4	1,286

This shows an increase during 1903-4 of five per cent as compared with 1902-3, but a decrease as compared with 1901-2

The fluctuations in prison population cannot be accepted as a correct indication of the relative number of crimes committed. In the enforcement of penal laws, public opinion, as represented by the administration of justice, is spasmodic. Periods elapse in which criminal offences excite no special interest and the number of convictions decrease ; while under the stimulus of some unusual crime committed, the public conscience will be aroused and for a time the penal institutions will be taxed to provide for the convicted delinquents.

An increase of prison population is more correctly an indication of police vigilance than of increasing lawlessness.

MOVEMENTS OF CONVICTS.

Penitentiary.	In custody July 1, 1903.	RECEIVED.			Total	RELEASED.							In custody June 30, 1904.
		From Jails	By Trans-fer.	Forfeiture of Parole.		Expiry of Sentence.	Pardon.	Parole.	Transfer.	Death.	Order of the Court.	Escape.	
Kingston.....	443	143	12	598	94	8	31	3	13	1	..	448
St. Vincent de Paul.....	335	127	35	1	498	81	5	35	9	2	1	365
Dorchester	237	113	350	44	10	37	2	7	..	250
Manitoba.....	140	113	253	30	5	10	39	2	2	..	156
British Columbia.....	95	47	4	146	22	3	9	3	109
	1,250	543	51	1	1,845	280	31	122	51	22	10	1	1,328

The number received from jails shows an increase of twelve per cent over the number received in 1902-3. Of the average prison population those released by expiry of sentence constitute 22 per cent ; pardons 2·4 per cent ; paroles 9·5 per cent and deaths 1·7 per cent.

COMPARATIVE STATEMENT OF PAROLES, PARDONS, DEATHS AND ESCAPES.

	Paroles.	Pardons.	Deaths.	Escapes.
1898-9.....	80	17
1899-00.....	71	70	22
1900-1.....	122	36	25	1
1901-2.....	157	43	14	1
1902-3.....	113	35	16
1903-4.....	122	31	23	1

It will be observed that the operation of the parole law tends to reduce the number of pardons granted. This partial substitution of parole for absolute freedom affords an additional security to the public. The restrictions attached to parole are an incentive to good conduct and the probationary period of conditional freedom affords a test of the assurances upon which the convict obtained his freedom.

The general effect of incarceration or institutional treatment is to lessen self-reliance, and it would be of mutual advantage to the convict and the state if those released by pardon or expiry of sentence were subjected to similar restraint for a reasonable period after release. It is the opinion of those engaged in the assistance of ex-convicts that direct police surveillance should be restricted to dangerous or habitual criminals. Those who really desire to become law-abiding citizens are irritated and discouraged by police interference and in several cases, within our knowledge, have assigned it as a reason for subsequent crimes. What such a man requires is a reliable

SESSIONAL PAPER No. 34

and tactful local patron or adviser to whom he can apply in case of difficulty, and who will advise, assist and encourage him in his efforts to rehabilitate his character. In Switzerland the system has been in practical operation for several years with extremely satisfactory results. The success of the 'prison gate' work carried on for the past few years by the Salvation Army in Toronto and elsewhere is an illustration of the wisdom of assisting convicts after release. It is no longer a mere theory. Its practical effects are known and acknowledged.

The principal officer engaged in prison gate work, Brigadier Archibald, of Toronto, has voluntarily undertaken to give special attention to convicts released on parole from our penitentiaries, and since the commencement of the current fiscal year he has been devoting his recognized abilities and energy to the work. The interest aroused by his efforts is already apparent and we are confident that the present year will mark an important epoch in the history of Canadian penology. The operation of the parole law has been a boon to many delinquents and an equal advantage to the state. With the supplementary provision for the employment of a parole agent of experience, ability and whole-souled devotion to the work there can be little doubt that the benefits intended and anticipated by the statute will be more fully realized, at least in so far as those paroled from Federal institutions are concerned.

AGE.

Years.	1901-2.	1902-3.	1903-4.
Under 20.....	134	156	161
From 20 to 30.....	493	504	538
From 30 to 40.....	298	306	342
From 40 to 50.....	174	170	189
From 50 to 60.....	73	68	66
Over 60.....	42	46	32
	1,214	1,250	1,328

Those under twenty years of age constitute twelve per cent of the entire number.

This fact brings the origin of crime very close to the home life of the country.

Although a number of these lads have come from, so called, respectable homes it would be difficult to find one who came from a home in which industry, thrift and obedience to authority have been properly inculcated, and it would be equally difficult to find one who has acquired a knowledge of any trade or calling sufficient to enable him to earn an honest livelihood. The parentage of crime has been ascribed to intemperance, illiteracy, heredity, companionship and many other causes, but though each of these may claim relationship, near or remote, the experience taught by actual contact with delinquents leads to the belief that idleness and improvident habits have a stronger claim to the position of direct parentage.

The inculcation of the 'gospel of labour' as expressed in the Pauline injunction 'if any would not work, neither shall he eat' is alike the essential foundation of good citizenship and of individual reform. Every delinquent should be given a sound practical illustration of its merits. In our institutions we teach practical trades and

4-5 EDWARD VII., A. 1905

endeavour, so far as is feasible under the congregate system, to prevent contact between young convicts and old criminals ; but the limitation of our work to prison requirements makes it difficult to enforce industry as it is understood and practised in outside industrial establishments. If our penal institutions rigidly enforce habits of industry, economy and obedience to authority and the release of the delinquent is followed by humane encouragement and assistance the state will merely have performed its duty and it will reap the advantages that accrue.

The system of fixed sentences, upon which our penal code is based, is open to grave objection. It is illogical in principle, ineffectual in results, and also inconsistent with the real object of imprisonment.

Individual freedom is enjoyed as the result of state protection, and the state has the rightful power to take away that which it has given. Such action can only be justified, however, on evidence that it is necessary for the protection of the individuals who compose the state. The right of the state to protect is undoubted ; the moral right to avenge or to enforce regeneration has yet to be established. Hence the real and only justifiable object of imprisonment is the protection of society. In the practical operation of the fixed sentence system there is a natural tendency to confuse incidental effects—such as punishment, deterency and individual regeneration—with the real object for which the sentence is imposed. In other words the incidental effects overshadow the real object with the result that the imposition of a sentence resolves itself into an attempt to equalize two unknown quantities. The degree of criminality in a delinquent cannot be even approximately estimated, much less definitely determined, by the exposure of one illegal act ; nor can the period of incarceration necessary to fit him

SESSIONAL PAPER No. 34

for good citizenship be accurately judged in advance by any exercise of the human intellect. Yet this mathematical impossibility is attempted every time a fixed sentence is pronounced. The judicial records are replete with illustrations of the effect of fixed sentences. For example, "A" has been a peaceable and law-abiding citizen for fifty years, but under the impulse of momentary passion commits a serious crime. The realization of the effects of his act may be the most complete safeguard to the public against its repetition. The statute, however, has fixed the penalty for the offence and the automatic action of the court sends him to the penitentiary, at public expense, for a long period of years. Another man "B", who is known to be an habitual criminal without other means of livelihood, is convicted of some minor offence and sentenced to the common jail for ten days, after which period he is released to renew his career of crime. In both cases it is the dead crime and not the living criminal that is considered.

From which of these men does society require the greater protection? How is it possible to administer actual justice under such a system?

We submit the opinion that a penological system that fails to safeguard the interests of society and ignores the real object of imprisonment is not compatible with modern civilization. A sentence to imprisonment usually (but not invariably) involves punishment, and it may or may not have a deterrent effect upon others. Imprisonment should be accompanied by all reasonable facilities for moral reformation. These are, however, merely incidental. All that the state requires—all that it has a right to exact—is that society shall be protected against the delinquent until he shall have given satisfactory evidence that he will comply with the legal requirements of the state and respect the rights of his fellow citizens.

The substitution of indefinite sentences for fixed sentences would involve a radical change in the principle upon which the penal code is based, and would also materially increase the labour and responsibility of the department concerned. It is, however, open to none of the objections that attach to the existing system, and it is absolutely consistent with the object to be attained. Among other advantages:—

(a.) It would provide a safeguard to the delinquent against the undue severity of his sentence, and to society against the inadequacy of the period of restraint.

(b.) It would enable the convict to realize that the key to freedom is in his own hands and that the only possible hope of future liberty depends upon his being amenable to advice and discipline until he shall have convinced the authorities of his sincere determination to be law-abiding.

(c.) It would obviate the abuses arising from attempts to 'make the punishment fit the crime', and enable the adoption of the more correct principle of making the period of restraint fit the criminal.

(d.) It would give perpetual protection to society against the determined and incorrigible criminal; instead of the intermittent protection afforded by the existing system.

(e.) The fitness of the delinquent to re-assume full citizenship would be determined only after a reasonable period of observation and by one authority upon uniform principles; thus obviating the scandal and hardship that arise from the inequality of sentences, imposed in advance, by jurists of diverse opinions, each acting upon his individual view of penal requirements.

We respectfully submit this matter for your consideration.

DUTIES OF OFFICERS.

The selection of officers is one of the most important matters in connection with penitentiary administration. The public, generally, have a very limited idea of the varied qualifications necessary in a successful prison official. 'The Personnel of Prison

Management' was the title of an able and exhaustive paper read at the National Prison Congress, in 1903, by Warden Haddox, of Western Virginia, from which we take the liberty of making the following extracts :—

How shall we keep pace in penal improvements with the great material progress of the outside world? The answer must necessarily be, that improvements in our departments of work must come, as they do elsewhere, by the investigation, the study, the thought and the effort of those who are in actual control, of those who are in a position to see, to observe and to know.****

Prof. Henderson in his admirable address delivered at the Philadelphia meeting in 1902 on the 'Social Position of the Prison Warden' says: 'Some institutions have no marked qualities; they have walls, cells, machinery, prisoners, punishments, but no distinct consistent and rational policy'.

Where this is true it means that the worst possible condition of affairs exists. Such an institution has the dry rot. It is managed (or rather mismanaged) by time-servers, too careless to feel the high responsibility devolving upon them, and too listless to acquaint themselves with the many opportunities spread before them to improve and keep pace with the onward march of progress. Such officers in their abuse, by inaction, of the opportunities afforded them, commit crimes against criminals and through them against society.

On the contrary, institutions which have distinct characteristics, have them as the result of the careful investigation, the patient research and thought of those who are in responsible control; and those characteristics reflect the wisdom and intelligence of those who have given their energies and their lives to the special work in which they are engaged. The warden is the one official who can give tone, expression and colour to the institution. He is distinctly and positively its managing head, and upon his intelligence, interest, zeal, tact and discretion will depend, almost entirely, its weal or its woe. He must be a man of intelligence and be willing and anxious to increase his fund of knowledge and information. He should be a profound student, not only of the ordinary subjects that attract the student, but of prison systems, of laws, business, government, society as it exists, and of human nature in all its many phases.

No difference how elaborate a system may be found in any institution of this kind, the warden will always be an intensely busy officer. If he would prevent chaos and confusion and obtain from every official the highest and best work of which he is capable, he must organize every department thoroughly. Every officer and inmate must know his exact duties so far as it is possible to know them and be made responsible for those duties.**** Thorough system in every detail will conserve the capacities of all his subordinates and leave him in a measure free to observe the actual conditions, and to plan and put into effect improvements along moral, industrial, physical and financial lines.

The financial question in every prison is an extremely important one. A warden performs no more important function than when he sees that the funds of the institution are so used as to effect the highest possible results, and that all the forces of the prison are so energized and conserved as to permit, under ordinary conditions, a satisfactory and proper earning and economizing power.**** Discipline in a prison is its first requisite. Nothing can be accomplished until officers and convicts are under its sway and control.**** To bring law breakers into habits of obedience and control requires the highest type of skill, tact and discretion. Punishments and rewards must be so blended as to effect the needful results with the least possible friction. No warden can afford to delegate the matter to another. His first duty to himself, is to preside over or assist in the trial of offenders and to order discipline. Individual treatment is a necessity in our dealings with delinquents, and a study of the many phases of delinquency is a prime requisite in a successful warden.

Brainard F. Smith says: 'Many a prisoner has been ruined beyond reclamation by punishment; while many a prisoner has been reformed—or, if not reformed, made a better prisoner—by punishment.****

But a warden's disciplinary powers are apt to be taxed more severely in another direction. The great problem ordinarily, is not so much the discipline of the convicts as that of subordinate officers. If subordinate officers will obey the spirit and the letter of the rules the convict has the potential influence of a powerful example to aid him. 'Like master like man'. In institutions where officers are appointed solely with reference to their fitness comparatively little trouble should be had in the matter of discipline. But where places are given to heelers, ward workers and political strikers, the matter of efficient discipline is a question of grave concern to the warden. In the absence of better material, however, he must address himself to organizing what he has to the standard of the highest efficiency possible, insist upon rigid discipline and adhere to his demands with Spartan firmness.****

He must have the courage to weed out and eliminate useless barnacles in the shape of incompetent and worthless employee and substitute in their stead men of capacity, character and intelligence, who are in love with their work and believe in its dignity and usefulness, the courage to face demagogues in their efforts to take from the prison its educative, moral, reformatory and economic force, and insist upon the right of the unfortunate inmates to learn the gospel of labour under right and just conditions.****

The twentieth century warden believes in the gospel of productive labour, of education of hand, head and heart, in the deprivation of privileges as punishment, the segregation of the desperate and more hopeless, the enlightenment of an all potential, all influential example, and the motto of Pope Clement, 'It is of little advantage to restrain criminals by punishment unless you reform them by training and teaching.'

Regarding the duties of the prison chaplain Warden Haddox states :—

It is personal, individual work that counts in a prison. All of the chaplain's work should be thought out beforehand, be methodical, intentional, systematic and thorough. The chapel service should be rational, of the proper length, with exercises, song service and preaching service carefully chosen. There should be no room in a prison service for the spectacular, the highly emotional and the haphazard sermons and addresses of a chance visitor. A reasonably rigid censorship ought to be exercised over the contributions of outsiders to the chapel service. The influence of sightseers and idle visitors to prisons, always bad, reaches the acme of its perniciousness in the chapel service, if unrestrained by prison officials of experience and firmness, who are in a position to know that sickly sentimentality is the worst pabulum to offer men already too eager to justify their evil deeds.

SESSIONAL PAPER No. 34

The duties of the subordinate officers are thus referred to :—

The subordinate officers of a prison are very important factors in its management. They come in actual, continual, personal contact with the men. No difference how capable and zealous may be the warden and his deputy, unless they have men of character, zeal, intelligence and discretion to carry out their orders faithfully, all their plans will come to naught. Guards, keepers and watchmen should be of good moral character. It is useless to talk about reforming convicts unless they have continually the benefit of good examples set before them. Precept amounts to nothing unless re-enforced by example. They should be educated and intelligent. Their duties are largely discretionary, and in their contact with convicts a high order of intelligence is necessary to know the right thing to do. Strict integrity and truthfulness are prime requisites. An officer's word should be beyond question and he should be absolutely impartial in his dealings with his men.

No special system will bring the highest results, without the right kind of men behind it. Any system with men of character, conscience and capacity will achieve great good. Any system with men of bad character, ignorant, careless and indifferent will fall to the ground.

A common impression prevails that any one is good enough for a prison guard, and if he is too old, too feeble and decrepit or too lazy for other work, his political strikers will help to unload him on the penitentiary authorities. All in authority should set their faces absolutely against this erroneous and terribly harmful idea.

At the last session of the National Prison Congress a paper on the ‘Rights and Duties of Deputy Wardens’ was submitted by Warden Wolfer, of Stillwater, Minnesota. As the subject is dealt with in an exhaustive and practical manner, we take the liberty of attaching it as an appendix to this report. Warden Wolfer's continental reputation as a successful administrator is sufficient guarantee of the value of the views expressed.

1903-4.....	14	7,456	543

The per capita cost of the jails is based upon the net expenditure.

MATERIAL CONDITION.

The prison buildings and equipment are maintained in good condition, and new buildings are being erected where required.

The ancient east wing of the Kingston Penitentiary is being rebuilt. At the St. Vincent de Paul Penitentiary modern waterworks of sufficient capacity to ensure adequate fire protection were installed during the year, and satisfactory progress was made with the new workshops. At the Dorchester Penitentiary work on the second section of the permanent workshops, which are to replace the antiquated wooden structures now in use, was begun last spring. Rapid progress is being made with the stonework. The instructor in charge hopes to finish this section next summer, when he will begin work on the third and last section. At the Manitoba Penitentiary brick works were installed, and a quantity of brick manufactured. The first section of the permanent workshops was erected during the summer and fitted up with sixty temporary cells for the accommodation of convicts while the prison wing is being extended. The proposed extension will double the cell capacity of the penitentiary. The excavation for the foundation is made and work on the building will be started early next spring. Rapid progress is being made on the new cell wing at the British Columbia Penitentiary. It will contain

4-5 EDWARD VII., A. 1905

one hundred and fifteen cells. Like the proposed wing at the Manitoba Penitentiary, it will be absolutely fireproof. An extension of the cell wing of the Prince Albert Jail, which will more than double the capacity of this prison, is under construction. At Regina Jail six new cells have been built and the cells heretofore set apart for prisoners awaiting trial have been made available for prisoners undergoing sentences. There are now forty four prisoners undergoing sentences, twice the number available two years ago. A portion of the administration building has been fitted up for prisoners awaiting trial. The capacity of this jail is taxed to its utmost. Frequently during the year the number of prisoners exceeded the number of cells, and, in spite of the danger attending the practice, it was necessary to let several prisoners sleep in the corridors. When the Edmonton Jail is opened it may relieve the congestion here. If not, increased accommodation must be provided.

The quarrying and dressing of building stone, the making of brick, and all building operations are carried on with prison labour.

Respectfully submitted,

DOUGLAS STEWART,
G. W. DAWSON,
Inspectors

OTTAWA, December 1, 1904.

APPENDIX TO INSPECTORS' REPORT.

Paper submitted by Warden Wolfer, of Stillwater, Minnesota, at the Session of the National Prison Association held at Quincy, Illinois, September 1904, subject :—'The Rights and Duties of the Deputy Warden'.

The writer has long thought that the subject of 'The Deputy Warden; His Rights and Duties' should be discussed and considered by this Association, and especially by those wardens who have also filled, during their prison service, the position of deputy warden. With the hope of arousing such discussion, thereby throwing light upon the duties, responsibilities and trials of a hard-working, and—in the main—loyal and deserving class of prison officers, this paper is offered by one who appreciates their importance in prison management, and takes pride in having borne with them something of the burden and heat of the day.

In a successfully managed penitentiary or prison the deputy warden, must be the mathematical complement of the warden in filling out the circle of executive ability demanded by the high purposes of modern penal methods. Whatever one lacks of education, experience or tact in handling the criminal merely as a prisoner, or of knowledge of human nature and didactic ability necessary in the education, training and discipline of both officers and prisoners, the other should be able to supply.

As the segments of a circle must fit to each other with great nicety if the circle is to even approach perfection, so in the successful management of any penal institution must there be no lack of confidence between these two officials; no separation through jealousy or treachery, and no opposition in method or purpose.

That the deputy warden is an important officer is evidenced by the statement of his duties and responsibilities in the rules and regulations of most every institution of the kind.

In view of the deputy warden's importance there is no room for any other person or official to stand between him and the warden. While the rules exact from him the utmost faithfulness and loyalty it must also be evident that the warden, on his part, owes something of faithfulness and loyalty to the deputy.

It becomes evident therefore from the wording of the rule, that 'all orders and directions of the warden in regard to guards, foreman, employees and prisoners' shall be frankly and freely given to the deputy warden to transmit to their various destinations, or for his immediate guidance and information, and that the plans and wishes of the warden should be communicated to him before they become the property of subordinate officials or prisoners. The relations of officers and guards in a prison are not only military in their character but go beyond that to a situation of personal contact and relation, with the constant disadvantage that such relations are always incurred in the presence of shrewd, active and subtle enemies, whose chief interest consists in weaving discord into the fabric of prison administration. The deputy is charged with the duty of exacting from all guards, foremen and other employees, intelligence, fidelity and zeal in the performance of their duties.

"He shall enforce obedience to the penitentiary rules and regulations and to all orders given from time to time by the Warden, and shall maintain generally the police and discipline of the penitentiary with the strictest exactness."

Such duties, incurring for their executor, as they almost invariably do, the personal dislike and enmity of those who need such compulsion whether guards, foremen, employees, or prisoners, renders the position of the deputy (if he does his duty) either uncomfortable, or ineffective, and consequently, soon untenable, unless full support is given to him by the warden whose assistant and agent he is.

If smooth and plausible persons, whether subordinate officers or prisoners, can wean the warden away from direct dealing with his deputy into indirect methods, such as going around the deputy to issue orders directly to subordinate officers or prisoners, the

prison administration will soon degenerate into the state of 'a house divided against itself,' and, like the house in the scripture, the administration must fall. Every prison or penal institution has in its official force and among its prisoners certain mischief-makers of more or less ability who constantly endeavour to get between the warden and his chief disciplinary officer. Among the officials these are the people who are continually going to the warden with private information of a more or less exaggerated character, or to seek privately information or concessions which they retail or exhibit to their immediate friends and sympathizers as 'from the old man himself', and by which they seek to build up an idea that they 'are on the inside', and are able to say and do things which will influence the warden's action toward others. Sometimes they are skilful in placing the warden under personal obligations, and in obtaining from him a recognition which they mis-represent to others and use in the furtherance of their own selfish designs.

Wardens who have not served in some subordinate capacity in a prison, and the majority have not, would hardly believe how often the expression 'the warden told me' introduces some piece of arrogance and assumption which is the fore-runner of mis-interpretation and mischief. Here is where the warden stands in need of previous prison experience, and where he should, at least, possess strength and tact. Here is where he should possess particularly the quality of unsusceptibility. He should be slow to follow his prejudices, or able to control them, or he will be unwittingly led by these same mischief-makers into discrediting among officers and prisoners the standing of him who should be his assistant and agent, and whose success in many trying places depends largely upon his standing in the eyes of officers and men. Matters which would be trivial in any other business, become, in the handling of a population of restless, impatient and naturally hostile prisoners, easily magnified in their effects, and lead to serious drawbacks even if apparently only the results of 'cross-purposes'. It is not intended here to say or intimate that the warden should have no acquaintance with his subordinate officers, and no dealings with them, but he must be very careful that his dealings are not misrepresented or misunderstood. He should not, for instance, invite or permit critical discussion by subordinate officers or guards, in his presence, of the actions of his deputy, unless that officer is also present to be heard in his own behalf. The just warden will always require that fault-finding statements made to him by subordinate officers and guards concerning his deputy be made in writing, signed by their authors, and copies furnished to the accused, the same as if they were formal charges.

To 'turn down' or publicly annul a deputy warden's order on the complaint of some officer or prisoner, or merely to show 'who is boss' is to surely and speedily destroy the discipline of the best prison. Where the deputy's order needs revocation it should come, apparently, at least, through its author, and without notice to the public that its revocation was otherwise than voluntary. All good men make mistakes, and the best deputy will make them; but all his mistakes should be carefully corrected with and through him lest the corrections involve other and greater mistakes.

Few wardens become the heads of penal institutions because of their previously acquired experience in the actual handling and control of prisoners and especially in the multitudinous details which constitute the discipline of an institution. The rule is that the man generally elevated to the place of chief executive is one whose education and experience have been acquired in some other business, sometimes in purely political business, and who, however admirable he may be in attainments, personality and experiences in outside matters, comes to the prison having no acquaintance with the peculiar people and conditions of life to be found within prison walls, and, consequently with very little ability to deal with the criminal as such. He may possess great humaneness and largeness of heart and still commit grave errors if he knows not how to apply the use of these qualities to the betterment and uplifting of the prisoner. He should not get the wrong idea of prison reform and too early imagine himself a prison reformer. Prison Reform, in its best and highest application, while it may include the amelioration of such physical conditions as are *unjust*, does not mean the amelioration of the physical conditions of a prison to the extent of making an imprisoned criminal content with imprisonment, for that would make him also content with criminality. The criminal in prison is not reformed because he fawns with real or feigned gratitude upon

SESSIONAL PAPER No. 34

one who relieves him from what he hates. Indulgence is not always kindness to either children or prisoners.

On the other hand, those who are efficient and capable as deputy wardens or disciplinary officers, and who, through years of proven ability, have obtained deserved recognition as good prison men, are those who generally have had little of the education and training which would fit them for becoming the heads of mercantile establishments or for dealing with the public in the ordinary affairs of business. Here is where the two lines of prison service,—that of the warden and that of the deputy,—are apt to become entangled if great care is not exercised, or if either attempts to take a hand, without proper qualification or proper diplomacy, in what is clearly the business of the other.

Most prison rules have in them the provision that 'in the absence of the warden from the penitentiary the deputy warden shall perform his duties.' Sometimes a very good deputy, in such an emergency, becomes imbued with the idea that he is 'king for a day' and proceeds to the assumption of prerogatives that are not his at other times and are not necessary to the status of a warden *pro tem*. Considering himself an international lawyer, as all Americans are very apt to do, he proceeds to set up a 'de facto' government and to slightly change the policy of his chief, in some trivial matter may be, but with no less bad effect upon the discipline of the institution, because the change at such time and under such circumstances can hardly fail to carry to the minds of all concerned even a faint idea of disloyalty. If he is unjust or tyrannical in his nature it is probable that he will, at this juncture, attempt to pay off old scores by putting the guard or the subordinate who has previously earned his displeasure under some annoyance or into a position where he cannot successfully obey an order, or must necessarily disobey an ambiguous order, and thus render himself apparently disobedient and a subject for punishment. To a good deputy even the temptation to 'get even' with a guard whose sneaking avoidance of responsibility has perhaps led the deputy into some position of personal or official danger at a previous time, comes with surprising force when the deputy finds himself during the warden's vacation, master of the situation. Right here let me describe three kinds of prison guards. First, there is the true soldier, the man we all love; whether he be prince or peasant, a general on horseback or the humble private of the ranks struggling through the weary march; or even, if, without military trappings and the 'pomp and circumstances of war' he be only the private citizen who intelligently recognizes and fearlessly meets his full duty and all its responsibility. He is the guard who is not afraid to let every prison law-breaker and disturber or the smooth and cunning mischief-maker know at once that he intends to do his whole duty and to compel everybody else to do theirs. He is the man that the deputy who is worthy of the rank and title will 'back to the limit' in any emergency. When a report or complaint comes in from that guard, the deputy knows at once that it means all that it says. He knows and feels that if this guard says that certain things are facts, they may be depended upon as facts, no matter how pathetic and tearful and convincing may be the statement of some shrewd and plausible liar to the contrary. If the deputy be of like metal,—and he should be—there is at once a bond of sympathy established between them, and it is a most natural thing if friendliness is even a very small part of the deputy's nature,—that such a guard should reap some substantial benefit.

Then there is the blunderer,—the guard who may be a model of good nature at certain times, and unreasonably ill-natured at other times,—the man who must be excused for overdoing his duty at one time, because he has little judgment, and who must be excused for improperly doing his duty at another time because he *intended* to do better but just didn't. He is the man who is most apt to think that the deputy is unjust and tyrannical at the very time when that officer, because of the guard's stupidity, has to risk his own neck to make it safe for him and others of like good intentions to continue on the pay-roll.

Then there is the guard who shirks responsibility and avoids performance of hazardous duty, denounces the strictness or severity of rules and regulations to the convict whom he fears and with whom he pretends to sympathize, and, at the same time, by exaggeration and falsehood, provokes the deputy warden's suspicion against that very same convict. He is the guard who puts convicts on picket to inform him when the

warden or deputy warden is coming ; who is painfully attentive to duty when he is under observation ; in whose ship it is almost impossible for the deputy to discover any small point of disorder unless he can successfully circumvent the watchfulness of the pickets ; because when the pickets signal 'Screw-driver in sight', like the well-trained crew of a battle-ship at the approach of the enemy, every man 'goes to quarters' or is made to feel the weight of the guard's displeasure in some hatched up complaint against him next day. This is the guard who has to be rescued now and then from the personal attack of some manlier convict who has felt the sting of injustice. Because he has been attacked by a convict he is sometimes supposed to be a good 'prison-man' and often receives misplaced sympathy and commendation before his real character becomes known to his superiors. This guard is often the one who sends word from home that he is too sick for duty when the League ball-games are on, and who is often sick or ailing when his turn of extra duty comes round. He belongs to the bunch of guards who always want to go together when a convict escapes and they are sent out to scour the country, and who spend most of their time in the most convenient farm house, drinking butter-milk and playing cards, until such a time as they deem it safe to come in apparently exhausted and with a detailed and circumstantial account of a diligent search. He is one who thinks that the warden and deputy are over-paid and over-estimated ; who has most often a complaint against the deputy's alleged favouritism or unfairness. What wonder is it then if the deputy warden is sometimes human enough to 'rub it in' a little when the opportunity presents itself, even if he is ordinarily even and just ?

Sometimes it is the deputy who is the shirk and the time-server ; who is lazy and treacherous, and adopts the criminal's idea of right and wrong, or, rather, his ideas of power and weakness, which are often substitutes in the criminal mind for right and wrong.

Sometimes such a deputy is the one who has out pickets, or relies upon spies in his efforts to outwit the warden and protect himself from the just deserts of his treachery. He seeks by favouritism and by jugglery of responsibility to put credit for all seemingly good things upon himself, and blame for all harsh and unpleasant things upon some one else. He pretends to agree with the troublesome prisoner that the action of the guard who reported him for punishment was unjust or hasty or the result of bad management or bad temper, while he at the same time pleads the harshness of the rules or the warden's orders as his excuse to the prisoner for punishing him. He sometimes possesses cowardice to the extent of winking at the doings of dangerous prisoners and at the same time treating with undue severity the mild and harmless who violate the rules.

He strives to build up a following among the officers and guards, with certain of whom he enters into a secret exchange of information on subjects pertaining to the business, while all who do not bow at his shrine may get along the best way they can. He is sometimes filled with the idea that he is destined to some day crowd the warden out of office and occupy the throne himself, and with that idea in mind he renders no more of loyalty than enough to keep him in the line of succession. Like some diseases, however, such a deputy is self-limiting, and contains the seeds of his official destruction, which should come as soon as his character has been fully discovered.

In the absence of the warden from the institution the deputy should, therefore, be extremely careful to maintain the exact status of the prison as it existed at the time of his chief's departure, and should perform only such parts of the warden's duties as are rendered unavoidable by the necessities of the service. He should not attempt to occupy the warden's private office, or indulge in any of the prerogatives which belong exclusively to his office, unless he wishes to make himself ridiculous and give to the observant ones around him the evidences of a childish jealousy, and thus generally lower the tone of discipline, rather than increase his own importance in the eyes of other officers and of prisoners.

The deputy warden should not allow himself or his indiscreet friends to advertise him as the real prison expert, 'The man who does all the work,' even if his knowledge of the business is actually greater than that of his chief by reason of a greater number of years of contact with prisoners or handling of criminals.

SESSIONAL PAPER No. 34

On the other hand, a newly-made warden will do well to rely,—and to let it be *known* that he relies—on the knowledge, sincerity and faithfulness of his deputy if that official is worthy of such reliance and trust. The newly-made warden should not yield too readily to the idea that his new discoveries in the art of prison administration are direct revelations from the Almighty, and that ‘after six weeks’ study of the question’ he ‘knows all about it.’ While I do not maintain that the deputy of a dozen or twenty years of prison service is always a Solomon in prison wisdom, I do maintain that a prison warden of only a few months of prison service, who comes from a totally different field of life into the strange conditions and circumstances of a prison or penitentiary is much less apt to be found to be a Solomon in the business.

Most of those who listen to me are acquainted with the difficulties attending the ‘breaking in’ of a green guard. How, for the first few months of his prison experience the main trouble seems to be to get the guard to avoid becoming personally familiar with the convicts, to omit telling all he knows to the officers’ barber, and to entertain enough suspicion of convicts in general to prevent their getting his gun away from him or sending him on some fool’s errand while they carry out plans of their own. He is very apt to think at first that the prisoners are really abused by the strictness of the rules and regulations and the severity of the deputy warden.

He apparently discovers a lot of things in the rules that are childish in their nature and are evidently put there only to nag the convicts into violations which result in their punishment and loss of ‘good time’. In fact, if you were to obtain his confidence, he would probably tell you that he knows these things to be true because some of the older convicts told him so! He is then probably ready to go before the State Board of Charities or a committee from the Legislature and help some ex-convict or discharged guard to prove that the deputy warden is a hard-hearted and cruel man. He listens to pathetic stories and is convinced that the laws of the country are unjustly applied or whimsically executed, and that a large proportion of the prison population are the victims of their misplaced confidence in the impartiality and exactness of the blind goddess, or have simply chosen a wrong straw from the hand of chance; rather than they have attempted to get something for nothing! He becomes interested in certain smooth convicts who, in turn, pretend to discover that he is wise, humane and just, and is destined to become famous in prison revolution if not in ‘prison reform’. At this stage of his experience he is apt to lend some out-going prisoner five dollars for the return of which, he, at first, has a ton of confidence in one pan of the scales of his credulity, with, perhaps, only a grain of anxiety in the opposite pan. A month or six weeks later he probably has a ton of anxiety on hand, with only a grain of confidence to weigh against it. For ‘Jimmie,’ or ‘Tommy’ or ‘Jack’ has had surely ample time to send back the diamond ring which was promised, having reached his home and ‘embraced his dear old mother’ before now! Or some convict’s childlike sister comes to town, and, after visiting her brother decides to wait over in town one more day in hopes that the warden will grant her another interview,—although the rules say that a few weeks’ interval must elapse between visits,—and at the request of the imprisoned brother, who is fearful lest some harm befall her, the guard endeavours to be polite to her.

After a few months of his prison life have developed these and other confidence games of greater or less danger to him, the ‘new screw,’ (as the convicts call him) is liable to suddenly develop a desire to enforce not only the letter of the rules and regulations, but the punctuation marks as well, and for several subsequent months of his career he reports prisoners for punishment on the very slightest pretexts, without any consideration of circumstances, and is indignant if the deputy does not punish every one that he ‘sends in’. Then the work of moderating his ardour must begin, and patient instructions and coaching must be given to key up his watchfulness, develop his shrewdness, promptness and exactness, and at the same time bring into use whatever he may have of capacity for the observation of human nature or resource and tact in dealing with it. As a prison warden of many years experience once said ‘it takes about three years to make a good prison guard’. He might have added,—‘and a good deal of common sense’.

Breaking in a new warden is a much more difficult and discouraging job than making a good guard, as any deputy warden of experience and skill will tell you, for it

4-5 EDWARD VII., A. 1905

is not in the nature of prison life for the 'tail to wag the dog' any more than in other phases of life, canine or human. The temptation to use suddenly acquired power is one that only the greatest self-control, forbearance and modesty can enable us to resist with dignity. An officer placed in command of a regiment in active campaign has not more of responsibility than has a warden placed in charge of some great penal institution for the first time, where also the lives and destinies of many men are largely under his control and influence.

Without abdicating his throne or abating his official power and dignity, he will, if he is wise, first choose an 'assistant and agent' worthy of his trust and confidence, and secondly, repose trust and confidence in him. He should let no desire to display a suddenly and mysteriously acquired skill lead him into a hastily considered attempt to do a new thing.

On the other hand the deputy even if he be an efficient and wise officer, must not imagine that all of prison wisdom is his own exclusive property, or he will miss in his career the 'the new lands' of discovery from which sometimes come the best fruits.

In the absence of the warden from the prison neither the warden's wife nor his 'son and heir' should assume to be the administrator of his official duty. There is sometimes a tendency to 'lord it' in those who attain the management of a penal institution in which the subordination of one grade to another, clean down to the menial service performed by prisoners, introduces something of the condition pertaining to a baronial castle of feudal times, and causes the children of resident families (and sometimes their elders) through the flattery of convict servants to imagine themselves 'princes of the blood'. I knew of one warden's wife who dubbed his official residence 'The Castle', named the largest apartment in the residence 'The Banqueting Hall', adopted a coat of arms and was quite indignant when the deputy warden failed to obey her orders in some item of prison business which came up in the absence of her 'lord.' Her patent of nobility 'ceased and determined' one day when her 'lord' was declared 'attainted' and was officially decapitated by the politicians of the other crowd, who had become king of the realm by virtue of an 'off year' election. The institution over which he reigned is still running successfully.

Housed in the institution or on the property of the state, 'royal' styles of living should never be attempted by either the warden or the deputy or their families, nor should social arrogance and haughtiness obtain in their treatment of each other, or the people around them; for American communities and commonwealths will never brook anything but common sense and simplicity in their officials, and officials who cannot 'get onto' this fact, show a dullness of comprehension which should dispossess them of office, whether they be prison officials, governors of states, or sit in the presidential chair.

In the prison or penitentiary where common sense, loyalty and faithfulness prevail with and between the warden and his deputy or chief officer,—in short, and with emphasis,—where the Christian spirit prevails, will peace abide and the best work for criminal humanity and for the state and nation be accomplished. For if this spirit be found at headquarters it will permeate all through the institution just as surely as will suspicion and distrust and all their attendant evils. When favouritism and foolish indulgence disappear; when officials forget self-aggrandizement and notoriety in the effort to hold up before those perishing in the wilderness of criminality *the law which alone can save to man his rights and liberties*, then will be attained the high plans in prison work for which we strive to-day, and then prison wardens and prison deputies and guards will properly represent to those under their care the kindness and the protection of the law as well as its power and irresistibility.

It must then be with the idea of rendering the best service and of doing the greatest good that the deputy should pursue his many duties if he is to win the plaudit of 'well done' at the end of his labours. He must carry into every one of his trying duties the greatest manliness, the sincerest loyalty and the most unswerving honesty. But he cannot make or keep good discipline or compel the best and most helpful treatment of the prisoner from others if he stands alone and unaided. He, like the soldier in the battle-line needs the friendly elbow touch of faithfulness and loyalty. He needs our prayers, our friendship and our open encouragement.

APPENDIX A

WARDENS' REPORTS

KINGSTON.

KINGSTON, August 1, 1904.

To the Inspectors of Penitentiaries,
Ottawa.

SIRS,—I have the honour to present my sixth annual report (with appendices) and to transmit statistical tables and returns from the various departments of the Kingston Penitentiary for the year 1903-4.

The total appropriation granted was \$178,600. Of this amount there was expended \$164,011.48, leaving a balance of \$14,588.52 unexpended.

Briefly stated the expenditure under the various heads was as follows :—

Staff, including salaries, retiring allowances, uniforms and mess.....	\$ 64,205 11
Maintenance of convicts (food, clothing and medicine).	16,378 90
Discharge expenses (freedom suits and allowances, transfers to other prisons and interments).	2,347 07
Working expenses : heat, light, water, maintenance of buildings and machinery, chapels, school, library and office expenses.....	19,352 47
Industries : farm, trade shops, binder twine...	48,464 13
Prison equipment : machinery, furnishings, utensils and vehicles, lands, buildings and walls.....	12,358 78
Miscellaneous : advertising and travel.....	905 02
Total.....	\$ 164,011 48

Items under 'Working Expenses' and 'Prison Equipment' exceed the estimated cost by \$2,711.25. Taking all the other departments together the expenditure was less than the appropriation by \$16,299.77. The net total expenditure for the year covered by the report was less by \$25,973.53 than the net total expenditure for 1902-3.

Per capita cost.—The average number of convicts for the year was 451. Gross per capita cost \$328.18 ; Gross per capita revenue \$171.73. Net per capita cost \$186.45, which is less than the net per capita cost for the year 1902-3 by \$56.97, and less than 1901-2 by \$121.52.

I still maintain that the statements annually printed, relative to the per capita cost of the several penitentiaries, are not only useless but misleading. From what I have set forth in the preceding paragraph the average reader will conclude that a rigid system of retrenchment had been set in motion and that a material saving has been thereby effected. Such is not the case. The lessened per capita cost simply shows, for the most part, a lessened expenditure for substantial improvement in buildings, or additions to lands. When we are building most and repairing most, and adding most to our fixed assets, we are utilizing our convict labour to the best possible advantage but we get no credit in the statements of per capita cost for results. This year we are reconstructing a cell wing which, when completed will have cost \$25,000 to \$30,000 for material used, and which, by our own labour will be made a \$60,000 asset, good for the balance of the century. Yet we are charged for outlay on material on current account and allowed nothing for our labour. The net per capita cost at Regina Jail, last year was about \$1,000, and at Prince Albert Jail \$1,147. They are building there and the small number of convicts they have makes the per capita cost look like extravagance.

The farm.—The crop of hay, roots and cereals, harvested last fall, was the largest in the history of the institution, and the prospects for the present season are good. Our

4-5 EDWARD VII., A. 1905

hay crop will be good and our extensive fields of carrots, turnips and mangles would seem to demand, for the consumption of our fodder crop a herd of cattle in addition to a well stocked piggery. The question of establishing a cattle-feeding industry at this penitentiary is already before you and as the months pass the necessity for such establishment becomes more evident. Stacks of hay now decorate several of our fields while one large barn is well nigh filled with last year's crop. How to dispose of so large a quantity of clover hay to advantage, without cattle to feed, is a problem, as yet unsolved.

The quarry.—The year's operations in our new quarry have proved it to be a valuable acquisition. But little trouble has been experienced with the accumulation of water which renders so many quarries comparatively valueless. The quality of stone in some of the beds is pronounced first class by the stone cutters while the more superficial strata are eagerly sought for ordinary building purposes.

East wing.—The work of demolishing the old cell block of the east wing was completed shortly after the beginning of the fiscal year and the work of reconstruction and extension has been pushed along as rapidly as possible. The instructors in charge of the work are confident that the extension wall can be completed and inclosed before cold weather arrives, without hindrance to the gang of 20 workmen on the cell block of the old part of the building. Altogether the work is proceeding satisfactorily, and, unless our operations are seriously interrupted by calls upon our blacksmith shop from points in the North-west where prisons are being constructed, we may hope to have the new wing ready for occupation in a much shorter time than was required for the completion of the other wings.

In this connection I wish to express appreciation of Warden Kirk's kindness in sending to our assistance last winter, Mr. McDougall, the competent and industrious mason instructor at Dorchester Penitentiary.

Population and movements.—We began the year with 443 convicts and closed with 448. Released during the year 150 : by expiration of sentence, 94 ; pardon, 8 ; ticket-of-leave, 31 ; transfer to other institutions, 3 ; by order of Court, 1 ; by death, 13, total 150.

Received during the year 155. Total increase, 5. Average daily population, 451. At close of the year we had but 11 female convicts.

For full details as to distribution and movements of convicts, changes in the staff, transfers, discharges, deaths, accidents, &c., I beg to refer you to the several statistical tables and returns accompanying this report.

From a disciplinary standpoint I am again enabled to report that the year just closed has been free from occurrences of an exceptional or extraordinary character. There was no escape or attempt to escape and, although offences against prison rules were numerous there was nothing approaching the gravity of revolt or conspiracy. Dissatisfaction with rations showed itself now and then, but removal of the cause invariably removed the dissatisfaction.

Industries.—Examination of revenue statistics will convince the casual observer that, outside the binder twine industry, we perform but little work productive of cash returns. We have sold during the year several cargoes of rubble or ordinary building stone from the quarry. We have also supplied a few toise of broken stone for concrete work to customers in the vicinity of the prison, but beyond this, we have done practically no custom work except to meet the demands of our own officials. Our quarry gang, stonecutters, blacksmiths, masons, carpenters, and plumbers have been kept tolerably busy in meeting requirements of east wing construction and making repairs to buildings, walls and fences. Tailors and shoemakers have something to do most of the time while our farmers have pretty steady work the year round. Nevertheless, we are often put to our wits end to find employment for all the men all the time. Sometimes it happens that we have to reduce the number of workmen in some particular shop—a proceeding which invariably, results in demoralization and discontent. We do not seek outside custom work but the temptation to do so is often very great. If ever the time comes when sound economic views obtain and public opinion warrants the management of

SESSIONAL PAPER No. 34

prisons on common sense principles, the convict will be infinitely more benefited and the public will be relieved of a large part of the expense of prison maintenance.

Binder twine.—I beg to refer you to appendix 'A' for summarized statement of twine manufactured and sold and of hemp purchased during the past year. Appendix 'B' will give the reader a correct understanding of methods adopted—the only methods adopted by us—to dispose of the products of our factory. Since July 5th, 1901, we have sold no twine to any but farmers individually or in clubs. We have employed no agents nor have we paid commission of any kind. The circular and club-order form exhibited in Appendix 'B' were printed by us and distributed and the terms and conditions therein set forth have been rigidly adhered to by ourselves and enforced on others. I do not know that we have been imposed upon in a single instance, but it may be that somebody acting as the secretary or agent of farmers sending club orders has been left with twine on his hands which, in good faith, he ordered for them, and that he sold such twine to the first comer to make good his remittance to us. What arrangements farmers clubs make with their secretaries or agents as to compensation for their trouble, I do not know nor does it concern our end of the business. Our prices and terms are fixed at the beginning of the season and are irrevocable.

We commenced the seasons operations with a fairly good supply of pure manila twine 600 feet to the pound and mixed manila twine 550 feet to the pound. The former was offered at 10 $\frac{3}{4}$ cents and the latter at 9 $\frac{3}{4}$ cents. Up to the time of writing 90 per cent of the orders received have been for the best twine. Should the remainder of the season exhibit the decided preference for first class twine regardless of price, I shall recommend that, in future, we use none but manila hemp and make none but the highest grade of twine.

The officers of the Kingston penitentiary have done good work and are deserving of commendation. To yourselves, as Inspectors, I am grateful for your kindly consideration of all my suggestions and proposals and the assistance you have rendered me in the performance of my arduous duties.

Your respectfully,

J. M. PLATT,
Warden.

APPENDIX 1.

KINGSTON PENITENTIARY,
OFFICE OF ACCOUNTANT AND CLERK OF INDUSTRIES,
KINGSTON, Ont., October 5, 1904.

J. M. PLATT, Esq., M.D.,
Warden, Penitentiary.

DEAR SIR,—I have the honour to submit herewith the yearly statement for the fiscal year ended June 30, 1904. I shall, for the sake of easy reference, group my details in the following heads:—

- (1) Twine manufactured.
- (2) Twine sold.
- (3) Hemp purchased.

(1) *Twine manufactured*:—The following is a summary of twine manufactured:—

Pure Manila, 600 ft.....	415,925 lbs.
Mixed Manila, 550 ft.....	125,490 "
Rope Yarn.....	58,850 "
	<hr/>
	600,265 lb.

DEPARTMENT OF JUSTICE

4-5 EDWARD VII., A. 1905

(2) *Twine sold* :—The following is a summary of twine sold :—

Pure Manila, 650 ft.....	7,225 lb.
Pure Manila, 600 ft.....	364,821 "
Mixed Manila, 550 ft.....	4,590 "
Pure Sisal.....	3,896 "
Extra Standard.....	5 "
Kingston Spl. or N.-Z.....	21,020 "
	<hr/>
	401,557 "
	<hr/>

This year we sold to more individual farmers than ever before ; we did not ship one carload and these orders were distributed from Prince Edward Island to British Columbia.

(3) *Hemp purchased* :—During the last fiscal year, we purchased, in all, 378,052 pounds of hemp.

We have received many testimonials this season as to the quality of our twine, and many expressions of appreciation of the Government's endeavours to assist the farmer.

I have the honour to be, sir,
Yours sincerely,

W. S. HUGHES,
Accountant & C. of I.

APPENDIX 2.

GOVERNMENT BINDER TWINE FACTORY,
KINGSTON, March 15, 1904.

SIR,—The factory at Kingston penitentiary will be able to supply a limited quantity of first class twine for use this season.

The brands for sale are 'Pure Manila,' running 600 feet to the pound ; 'Mixed Manila,' running 550 feet to the pound, and 'Pure New Zealand,' running 450 feet to the pound.

To make sure of the advantages offered by the government factory, please send in your orders at once, stating quantity and grade. Your orders will be booked and invoices sent to you. When you desire the twine to be forwarded send the money by registered letter. Express order, P.O. order or bank draft, together with shipping directions, and the twine will be shipped forthwith. If you remit by bank cheque please see that it is marked 'good' and made payable at par at Kingston.

Where it is at all convenient it is advisable that farmers join and send club orders for ton-lots or car load lots, through one of themselves, through the head of a farmers' society or union, or through any agent they may choose, provided they accompany the club order with a certified list of farmers who comprise the club, and show the quantity and grade of twine required by each. In this way they will secure the advantage of lower freight and save expense in registration, postage, commission, &c., in addition to the reduction in price of \$5 per ton. 'Club Order' blanks will be forwarded upon request.

The quantity of twine manufactured at the government factory is but a small fraction of the amount annually consumed by the farmers of Canada, and the entire season's output will, doubtless, be ordered during the next few weeks. If you intend to order do so at once. Should the following authorized schedule of prices be reduced before you twine is shipped, you shall have the benefit of any such reduction.

Schedule of prices to farmers only.

	cts
'Pure Manila,' 600 ft. to lb.....	10 $\frac{1}{2}$
'Mixed Manila,' 550 ft. to lb.....	09 $\frac{3}{4}$
'Pure New Zealand,' 450 ft. to lb.....	08 $\frac{3}{4}$

$\frac{1}{4}$ c. per pound off on ton-lots or over.

Terms :—Cash with order. All f. o. b., Kingston.

Address all communications and remittances to the Warden of the Penitentiary,
Kingston, Ontario.

J. M. PLATT,
Warden.

I hereby certify that I am one of the persons named as consignees in the following order for prison made binder twine. That I know every person whose name is signed to said order to be an actual farmer. That I believe each person will require the quantity of twine set opposite his name for his own use. That I am duly authorized to forward said order on behalf of the parties signing the same, and that I will, on behalf of said parties, receive, care for, and upon request, deliver to each of the persons signing said order, the quantity of twine specified as his individual order.

Signature of person giving the order.

J. M. PLATT, Esq.,
Warden Penitentiary,
Kingston, Ont.

Date 190

DEAR SIR :

Ship, on receipt of payment therefor pounds of binder twine
consigned to at
and the following farmers who have personally signed their names to this order :

Pure Manila, (600 ft. to 1b.).....	10½c.
------------------------------------	-------

Mixed Manila, (550 ft. to lb.) $9\frac{3}{4}$ c.

Pure New Zealand, (450 ft. to lb.)... $8\frac{3}{4}$ c.

$\frac{1}{4}$ c. less on ton lots. F. O. B., Kingston.

This order is given with the understanding that the twine is guaranteed as to quality and length per lb., and that we are to have full benefit of any reduction in price of prison made twine that may happen to occur before shipment of said order, and that, at any time before shipment is made, this club order may be cancelled in whole or in part in the event of failure of crops.

[illegible]

4-5 EDWARD VII., A. 1905

APPENDIX 3.

KINGSTON, ONT., June 30, 1904.

Memorandum for the Warden.—I have the honour to submit the following report on building and other industrial work for the fiscal year ended June 30, 1904.

East wing.—As it is necessary that this wing should be completed at as early a date as possible, the work on it has been given precedence over every thing else and very satisfactory progress has been made. The old cells and foundations were taken down to the rock and foundations built for the new cells with the old material, about 800 M old bricks were taken out, cleaned off, piled in the yard, and are now being used in rebuilding the division and back walls of cells. The extension to the wing is well under way and will be ready for roofing early this fall, stonecutters, blacksmiths, carpenters, and plumbers, have been busy preparing materials and putting same in place as the work progresses. The steel barriers, beds, tables, &c., are well advanced. A tile drain about 60 feet long, for which considerable blasting had to be done, was put in from the duct under the wing to the sewer in the yard.

Sewers.—The cumbersome stone flags used as covers for manholes to sewers have been replaced with cast iron covers, hinged and locked to a frame bolted to the stone coping.

Barns.—A new covering of metal shingles has been put on the roof of the large stone barn, and two dormer windows put in the roof of the granary.

Docks.—Another section of the dock was built during the winter. About 150 feet remains to be done to complete all the dock on the western boundary of the prison.

Fences.—The paling fence from Johnson St. to the Bath Road was taken down and replaced with a wire fence. The old palings and posts were shortened and used to inclose a piece of waste land behind the piggery for a pig pasture.

Hospital.—The extension of east wing necessitated several alterations to the hospital building. A new door way was put in at the south end with glass doors inside and steel barrier doors outside, and new stairway built from kitchen to basement.

Ice house.—The stone walls inside of ice house were strapped and covered with rough sheathing.

Stairs.—A new stairway with steel strings and oak treads was built from the north corridor of west wing to the Protestant chapel entrance.

Roofs.—The work of repairing the roofs of the different shops and buildings and covering them with a coat of roofing cement, was continued till the cold weather set in last fall.

West wing.—Storm sashes were made and put on all windows in the west wing which makes the building much more comfortable in winter.

North wing.—The main hall was improved by putting up a metal ceiling and cornice of neat design, graining woodwork, and papering the walls, concrete walks were laid at both sides of entrance.

Printing, broom making and weaving.—Two men are steadily employed at printing and book binding, two weaving towels, and one making brooms for this and other prisons.

Tailors and shoemakers have been employed in making clothing and shoes for Indians of the North-west Territories, officers uniforms, and discharge and prison clothing and shoes.

The school room, ceiling and walls were kalsomined and painted.

The usual repairs to buildings and work for other departments has been done during the year.

R. J. BURNS,
Chief Trade Instructor.

SESSIONAL PAPER No. 34

ST. VINCENT DE PAUL.

ST. VINCENT DE PAUL PENITENTIARY, July 1, 1904.

The Inspectors of Penitentiaries,
Ottawa, Ont.

DEAR SIRs,—Having acted as Warden until the fourth of March last, at which time I was appointed Warden of this institution, I have the honour of submitting to you my annual report for the year ending June 30, 1904.

The population on June 30, 1903, was 335. There were 163 admitted to the institution during the past year, including 32 convicts transferred from the Manitoba penitentiary. There were 133 convicts discharged during the same period as follows: expiration of sentence 93, pardoned 5, paroled 35, leaving a total of 365 on June 30, 1904.

I am pleased to state that out of the thirty-five convicts who were granted their liberty upon parole, only one of their number has been sent back to finish the remainder of his sentence. This excellent result shows that the parole system has obtained the point desired.

The appropriation for the fiscal year 1903-4 was \$110,300 of which we expended \$101,178.09, leaving a balance of \$9,121.91 unexpended. Our expenditure included \$5,794.60 for steel and iron purchased to make barriers for the Edmonton jail and Manitoba penitentiary.

Pump-house.—The new rock face building which we commenced during the summer of 1903 is now completed. It is equipped with a triplex pump, and a motor of 50 H. P. having a capacity of 500 gallons per minute. We also had one of the pumps with boiler and engine installed at the same time, so that in the event of the motor driven pump being temporarily disabled, the other will supply the institution with a sufficient quantity of water.

The entire plant is now working in a splendid manner and gives complete satisfaction. The materials employed in the construction of the pump house and the machinery installed therein are of the most modern kind and leave nothing to be desired.

Waterworks.—The laying and connecting of the new eight inch water pipe to replace the old one of four inches has now been completed and I am pleased to state that we have now an average pressure of 80 to 85 pounds, which can be increased to 125 pounds in case of urgency. We have also added two new hydrants in order to assure better protection to the various buildings in case of fire. All the hydrants are of the most modern make, having a coupling of 2½ inches diameter, each hydrant having attachments inside as well as outside of the wall, so as to render the best possible service in case of fire.

Stone-shed.—The stonecutters department is now installed in the new building, and I am pleased to state that it has proved a complete success. There is a tramway running through the center of the building, so that the stone is distributed upon trucks especially adapted for the purpose.

The old building which was previously used for this purpose, is now used by the stone breakers. This building is capable of accommodating 100 men, so that when the gangs working outside the boundary wall are prevented from going to their work on account of bad weather, we have them placed in this building breaking stone, the institution receiving the benefit of their labour during all bad weather. This is the first time that this system has been adopted here, and I have no hesitation in saying that it is a complete success in the interest of economy as well of discipline of the institution.

Farm.—As in previous years there has been considerable improvement in the drainage, fencing, and roads upon the farm. The revenue from this source for the year ending June 30, 1904, is perfectly satisfactory, not one cent having been expended for grain, straw, potatoes, vegetables or pork, the institution having provided all the above articles. There was also a large surplus of hay, which we disposed of for several hundreds of dollars. I can testify to the importance of the late enlargement of the farm, as we are now saving several thousands of dollars expenditure which we were previously compelled to make in purchasing grain, potatoes, straw, pork, &c., &c., the farm having been too small for the requirements of the institution.

I am pleased to state that the financial statement presented by the farm instructor, is satisfactory as compared with the previous years.

Brick yard.—The success that we have obtained in the manufacturing of brick leaves nothing to be desired. The quality as well as the quantity of the bricks made proves beyond a doubt the importance of this industry to the institution. The bricks will be used for lining the different buildings that we are now constructing. The industry enables us to utilize with profit to the institution the large quantities of clay and sand deposited in certain parts of the farm, that were too hilly for cultivation.

Quarry.—Work was resumed at the quarry during the first days of May last. The severe cold in addition to the large quantities of snow prevented us from carrying on the work during the greater part of the winter. This had the effect of delaying the cutting of stone during that period but this did not seriously interfere with construction as we had a large quantity of stone in advance.

New buildings.—We have now commenced the construction of a fine building in continuation to the stone shed which was completed last fall. One section of this building will be 108 feet long by 40 feet wide, and will be occupied by the stone breakers.

The second section will be 140 feet long by 40 feet wide and will be occupied by the blacksmiths and machinists. All the machinery at present in the machine shop will be transferred to this building and there will also be six forges for the blacksmiths with modern appliances attached.

The machinery of both these departments will be operated by electricity. The uniting of these two departments will make it the most perfect and best equipped as well as the most important, in the institution. The building will be constructed of cut stone, brick lined, and will be heated by exhaust steam.

Electric light.—Our electric light system works to perfection and gives complete satisfaction.

Female department.—During the year ending June 30, 1904, we received two females each condemned to three years imprisonment in the Saint Vincent de Paul penitentiary. As we have no female ward at this institution, we were obliged to have them transferred to Kingston penitentiary. I am strongly of the opinion that there should be a female ward attached to this institution. I am unable to perceive why we should transfer women to the Kingston penitentiary, when if we had the requisite accommodation they could be as well cared for here.

I have the honour of drawing the attention of the department to the importance of having a female ward attached to this institution.

Solitary Confinement.—I beg to call the attention of the department to the necessity of having isolated cells erected at this institution. My request for these cells is in the interest of a number of convicts whose physical condition demands complete isolation; as well as of a certain number of incorrigibles who demoralize discipline if attached to the gangs.

I believe that complete isolation for a certain length of time is the only means by which we can procure good results. Solitary confinement with suitable work, and good moral literature will contribute greatly to the comfort of a certain number of convicts whose mental condition is impaired. It will also tend to elevate the moral condition of

SESSIONAL PAPER No. 34

others. I hope the department will give my request serious consideration, as it is in the interest of good administration, economy, and justice that I make the suggestion.

North Lodge.—We expected to take possession of this building during the course of last fall, but we were compelled to suspend work on it during the greater part of last summer on account of the numerous other works that were being carried on.

I am now pleased to say that the work on this building has been resumed, and is rapidly nearing completion, and I have every reason to believe that the entire building will be in readiness for occupation during the coming summer.

The apartment situated at the west side of the building will be reserved for the armoury. There will be one room especially reserved for the arms and ammunition with a smaller one adjoining for the repairing of arms.

The east side of this building with the upper floor will be occupied by the store-keeper's department. The ground floor will be divided into two apartments, front and rear.

The front apartment will be used as an office and counting room, the rear will be used as the store room for paint oils, and hardware, &c., &c. The upper floor will be entirely reserved for dry goods, &c. All these apartments are furnished with fixtures especially adapted for the storing of the different goods that are required here. There is a weighing scale, erected between the barrier (doors), with a capacity of 20,000 pounds. The fixtures were manufactured and erected by the convicts in the carpenter's department, under the surveillance of the instructor, and the supervision of the chief trade instructor.

Escapes.—I regret to state that on the 28th March last, two convicts Louis Eumene and Joseph Filiatrault made a murderous attack upon keeper Blondin, and then made their escape.

After three days pursuit, we succeeded in capturing convict Eumene, who has since been placed upon trial, and was sentenced to ten years imprisonment for the offence.

Convict Filiatrault has not yet been recaptured. Keeper Blondin resumed his duty the 1st May last.

Conclusion.—In conclusion, I beg to offer you my most sincere thanks for your advice, and the kind attention that you have given to the different questions that I have submitted to you.

I also wish to express my thanks to the staff of this institution for the respect and devotion that they have shown towards me in the discharge of my duties.

I have the honour to be, sirs,
Your most respectfully,

OSCAR BEAUCHAMP,
Warden.

(APPENDIX TO WARDEN'S REPORT.)

ST. VINCENT DE PAUL PENITENTIARY, August 18, 1904.

SIRS,—I have the honour to submit the following report on the building and other industrial operations at this Institution for the year ended June 30, 1904.

New Pump House, Pumping Machinery and Water Mains, &c.—The work commenced May 4, 1903, on the new water works has been completed. This consisted of building a new pump house, of cut stone, lined with brick, steel ceiling, galvanized iron roof, concrete floors, a triplex electric pump with a capacity of 500 gallons per minute operating at 125 lbs. pressure and a 50 H. P. 500 volt motor to drive the pump, with automatic starting rheostat, has been installed therein. A new line of 8 inch mains from river to pump house, and 8 inch mains from the pump house

4-5 EDWARD VII., A. 1905

to the prison, has been laid, with all branches and connections complete. To transmit power to the pump motor, a generator set, consisting of one 60 H. P. 110 volt motor and one 45 K. W. 500 volt generator, has been installed in the power house in the prison yard. When the rheostat is thrown on in the power house, the pump is started automatically. This does away with the necessity of keeping an officer at the pump house. All that is necessary is that the electrician or engineer go there occasionally, say once a day, to oil the pump, and as a precaution to see that all is right. One of the steam pumps and boiler used in the old pump house has been installed in the new pump house as an auxilliary.

The excavation for laying of mains was a very heavy piece of work, whilst the work of moving and erecting the machinery was a very delicate undertaking. That everything was carried out without accident or injury is commendable, on the part of the officers who had the work in immediate charge. The entire system has been tested and in operation for some time and is giving good satisfaction.

New Shops.—The work of erecting new blacksmith, machine and stonebreakers shop, has been commenced. These will form a row of two story buildings on the west side of yard. It is hardly likely that they will be completed before the winter sets in, but the work will be so advanced that they can be completed and occupied early next summer.

Since the occupation of the new stonecutters shop, the stonebreaking gang have been moved to the building vacated by the stonecutters. The old wooden shanties in angle between north and east wings have been pulled down, removing a great source of danger to the institution from fire.

Brickyard.—The brickyard has been further improved by the removal of a large quantity of refuse excavation from the site of new buildings in the yard, levelling it up and extending it. A permanent kiln for burning tile and brick erected. The results obtained in the manufacture of brick and tile were satisfactory. The work is being continued this summer to still better advantage.

Tramway.—Further repairs have been made during the spring. The line has been levelled up and new ties put in, in many places, to replace those rotted away.

Steel Barriers.—The manufacture of steel barriers for British Columbia and Stony Mountain penitentiaries and Edmonton jail has been commenced. There are in all 288 barriers and 26 ranges of locking bars to be made for these institutions. The blacksmiths and machinists departments will find the present year a busy one.

General.—There is always in an institution of this kind a large amount of repairs required. In this work every branch of the trades have been engaged and fully occupied. Whilst some institutions find it very difficult to provide employment for the inmates, St. Vincent de Paul is happily not confronted with such a drawback. It is found (and will be so for many years to come) very hard to keep up with the work required to be done.

In conclusion I am glad to say that the buildings throughout are in good repair. The sanitation and ventilation are good.

The officers in general have shown a marked degree of interest in their work during the year. The convicts generally are well inclined to good conduct and industry.

I am indebted to the Warden, for the firm support he has given me, and to the Chief Keeper, for the ready and loyal assistance rendered. To both I offer my sincere thanks.

Respectfully submitted,

GEO. A. PRATT,
D. W. and C. T. I.

DORCHESTER.

DORCHESTER, N.B., August 15, 1904.

The Inspectors of Penitentiaries,
Ottawa.

SIRS,—I have the honour to present my annual report comprising the usual statistical tables and reports of officers of the several departments of Dorchester penitentiary for the year ended June 30, 1904.

The following table shows the movements of convicts during the year :—

	Males.	Females.	Total.
Remaining at midnight, June 30, 1903	228	9	237
<i>Received since :—</i>			
From common jails	103	5	108
“ military prison	4	..	4
“ reformatory	1	..	1
Total	336	14	350
<i>Discharged since :—</i>			
By expiration of sentence	42	2	44
“ pardon	10	..	10
“ parole	37	..	37
“ death	2	..	2
“ order of court	7	..	7
Totals	98	2	100
Remaining at midnight, June 30, 1904	238	12	250

The daily average was 244·2 as against 220·7 the previous year.

There were two unsuccessful attempts to escape during the year.

The general conduct of the prisoners has been good and discipline has been maintained.

The prison has been remarkably free from any serious sickness and the convicts have enjoyed, generally, very good health. There were no accidents, and but two deaths from natural causes.

Three paroled convicts were returned to the penitentiary during the year having forfeited their licenses, and two were returned on new sentences, their parole having been thereby forfeited. This is not a large number considering there were thirty-seven paroled last year and thirty the previous year.

The operations of the farm have been fairly successful. Hay, which is our principal crop, was a short crop owing to the dryness of the season. Vegetables and cereals were a good crop, especially potatoes, which enabled the farmer to supply all the necessities of the prison without purchasing. The first time in the history of the penitentiary when vegetables had not to be bought.

Owing to the short crop of hay the beef cattle were butchered early in the season and supplied to the prison as required.

The usual quantity of unbroken land was brought under cultivation.

The thirty-two acres of land purchased last fall makes a valuable addition to our arable land lying, as it does, within easy reach of the prison stables. About one half this lot has been ploughed and sown with oats this year and promises a good crop.

4-5 EDWARD VII., A. 1905

The new stone piggery, commenced the previous year, was completed last November and has been occupied since to good advantage.

A section of the foundation of the new stone workshops, to the east of the main building, was laid last fall. Work was suspended when winter set in and resumed early in May and is progressing well under the official direction of the mason instructor. Preparing stones for this large building gives employment to a number of convicts in the quarry and stone cutters shed.

Please accept my thanks for your indulgence in overlooking my short comings and for guidance during the year. I have also to report faithful service and devoted assistance by the staff.

Yours faithfully,

J. A. KIRK,
Warden.

MANITOBA.

STONY MOUNTAIN, July 15, 1904.

The Inspectors of Penitentiaries,
Ottawa.

SIRS,—I have the honour to submit my annual report, together with crime statistics and other reports in connection with this penitentiary for the fiscal year ended June 30, 1904.

Remaining at Midnight, June 30, 1903.....	140
<i>Received since :—</i>	
From jails.....	112
	<hr/> 112
	252
<i>Discharged since :—</i>	
By expiration of sentence.....	39
pardon.....	5
parole.....	10
death... ..	2
transfer to other penitentiaries.....	38
order of Court.....	1
sent to Calgary for trial (hanged there on February 2nd, 1904).....	1
	<hr/> 96
Remaining at midnight, June 30, 1904.....	156

The daily average during the year was 144 as against 120 in the previous year.

You will see from the farm instructor's report that the farm comprises 330 acres under cultivation, of which about 210 acres are under grain and roots, the remainder hay and summer-fallow. Our crops are looking extremely well. The C.P. Railway have built a spur through our grain fields entering the farm at the S.W. corner, continuing on to a quarry at the N.E. corner of reserve. If this line is to be used next summer, the C.P.R. should build a fence on both sides of the track. If this is not done, we will have to give up farming that portion of our farm, as cattle will destroy any crop we put in. On account of the over-crowded state of this penitentiary, we trans-

SESSIONAL PAPER No. 34

ferred on the 12th November last, four British-Columbia convicts to the penitentiary at New Westminster and on the 15th December transferred 32 to St. Vincent de Paul penitentiary. The first section of the new work-shops (built on the east side of prison), which will be 87 feet long, 40 wide and two stories high, will be completed this autumn. We intend to use this as a temporary prison until the new extension of the cell wing is completed. This will, I trust, obviate the necessity of our having to transfer any more prisoners to other penitentiaries.

The stone foundation of this section of workshops is built and ready for the brick structure. Excavation has commenced for the foundation of the new cell wing extension. In May we commenced setting up the brick making machinery and on the 15th June commenced moulding bricks. This industry has been installed and operated by instructor Doyle of B.C. penitentiary, who appears to thoroughly understand his business and I am confident that under his supervision the very best of brick will be turned out.

A well has been bored to the depth of 141 feet on the east side of the prison wing. This well will supply water for a concrete tank or reservoir with a capacity of about 12,000 gallons. The concrete tank, with the iron tank we have in the attic, should give us an ample reserve of water. All the building and works now in progress will be done entirely by convict labour.

The workshops have been kept busy during the year. The carpenters, besides doing the necessary repairs to buildings, fences, implements, &c., have prepared all the wood-work, such as racks, pallets, kiln house, &c., for the brick yard; and are also preparing window and door frames for the new workshops. The blacksmith department has also been very busy. Beside the constant necessary repairs required in an institution of this kind, they have prepared all the work for new workshops and the brick yard.

The tailor shop has made all the uniforms for our officers and for the officers of Regina and Prince Albert jails, also all the clothing for the convicts here and for the two above named jails. There is a great deal of repairing to be done in the tailor shop and besides they had to make freedom suits for discharged convicts.

The shoe-shop has also been busy as usual, making boots for officers, convicts and discharged prisoners, and also for the officers and prisoners of Regina and Prince Albert jails.

When quarrying and working on the road leading down the hill on the north end of the reserve, all stone suitable for building purposes, is placed to one side and dressed for the new cell wing. The improvements have been done in a good workmanlike manner and reflect credit on all the officers concerned.

Yours faithfully,

A. G. IRVINE,
Warden.

BRITISH COLUMBIA.

NEW WESTMINSTER, November 25, 1904.

Inspectors of Penitentiaries, Ottawa, Ont.

SIRS,—I have the honour to submit my annual report, accompanied by statistical and financial statements for the year 1903-4.

The expenditure of this institution for the year was according to your schedule of expenditure \$14,170.34.

4-5 EDWARD VII., A. 1905

The following tabular statement shows the movement of convicts for the year just closed.

Received :—

Remaining at midnight, June 30, 1904	95
From common jails	44
Other penitentiaries	7
	— 146

Discharged :—

By expiration of sentence	22
Pardon	3
Parole	9
Death	2
Sent to lunatic asylum	1
	— 37
	— 109

We expect to have walls, cells and roof of new wing erected by spring next year. We would have had the work completed earlier only for the substitution of fireproof roof for wood and galvanized, as at first proposed. The new roof will be cement and expanded metal, and will be absolutely fireproof, which will make the new wing, when completed, a model, as far as fireproof construction is concerned. By the way the prison population is increasing it will not be finished a day too soon. We hope to have everything ready for occupation by July 1, 1905.

The chief trade instructors annexed report goes fully into what work has been done this year.

I very much regret to say that on May 9, 1904, we lost by death, our amiable Protestant chaplain, Rev. Thos. Scouler, who served the institution faithfully and well from his appointment, January 1, 1897. His loss was keenly felt by both convicts and officers, and his kindly way and Christian forbearance had endeared him to every one, irrespective of their religious proclivities.

The discipline has been well maintained during the year, and the officers continue to do their duty faithfully.

I have the honour to be, sirs,
Your obedient servant,

J. C. WHYTE,
Warden.

(APPENDIX)

CHIEF TRADE INSTRUCTORS REPORT.

Memo. for the Warden.—

In accordance with your instructions I have the honour to submit the following report of the various works performed during the fiscal year ended June 30, 1904.

New Wing.—Work on the erection of the new wing has been carried on as continually as possible since its inception. During the winter months work was continued under a canvas roof which, although broken down once by a heavy fall of soft snow, was repaired, and the first two tiers of cells erected. The outside walls were built up during the summer. They have now been added to and are up to the height of 28 feet, the top of the third tier.

Repairs to Buildings.—General repairs to buildings have been numerous during the year, but only necessary work has received attention.

SESSIONAL PAPER No. 34

Alterations in Basement.—The walls on each side of the north end of basement hall, also one cross wall on the west side have been removed and triple steel beams supported on cast iron columns were inserted. This change has made a great improvement in the basement, allowing more room in the kitchen and lighting up the whole floor space besides giving better ventilation. The kitchen received a coat of paint, &c.

New Bakery.—A new bakery was provided on the west side of basement. The outside wall was stripped of the decayed lath and plaster, and bricks were substituted. A baker's oven was built in the north-west corner of basement which has given every satisfaction. A glass partition was put in under the steel beam to inclose the bakery and allow of its supervision by the steward.

Meat Room.—A meat room was provided at the south end of basement hall by putting in a glass partition with door.

"K" Block.—Temporary cells were made on the top floor over the chapel. To accomplish this the brick walls on each side of the hall were taken out and timber beams inserted to carry the weight of the roof. The bell was moved towards the front of the building. The space over the chapel was then floored and cells formed by nailing corrugated iron on the rafters and studs and fitting doors made with wooden frames and iron rods. This alteration gives us 14 additional cells, which, although not as secure as those in the wing, relieves the overcrowding of the prison.

Brickyard.—The brickyard was kept busy last summer making brick for new wing. About 800,000 common, besides pressed brick were turned out satisfactorily.

Stoneshed.—A number of men were employed during the winter making hollow cement blocks for the new wing cell fronts when the weather was suitable. 1,550 blocks were successfully made accounting for 5,500 cubic feet of stone. The loss through frost and other causes was only about 2%.

Reservoir No. 2.—The ground has been excavated for a new reservoir, circular in plan. The inside dimensions of the finished reservoir will be 33 feet 6 inches diameter 12 feet deep. The wall will be built of brick bedded in cement mortar and grouted with cement and sand 1 to 3 mixture. The thickness of the wall will be twenty six inches at the bottom to a height of 4 feet, twenty two inches thick for the next four feet, and the remainder eighteen inches thick. The bottom will be covered with concrete five inches thick, composed of crushed rock, sand and cement in the proportion of 5, 3 and 1, the finish will be composed of a part cement, 1 part fine sand and $\frac{1}{2}$ part lime paste, this will be applied 1 inch thick on the bottom and $\frac{1}{2}$ inch thick on the walls. A water tight covering will be put over the reservoir, all woodwork being coated with 'Loftus Roofing Cement'.

Shops.—The shops have been constantly employed. Besides the usual work, there has been work done in connection with the new wing.

H. DISNEY.

Chief Trade Instructor.

APPENDIX B

SURGEONS' REPORTS

KINGSTON.

The Inspectors of Penitentiaries,
Ottawa.

SIRS,—In accordance with the statutory requirements, I have the honour herewith to submit my annual report of the medical department of this penitentiary for the year ended June 30, 1904.

The health of the prisoners during the year has been much better than could be reasonably expected in consideration of their general condition. I am glad to be able to state that there was no epidemic, and no deaths occurred from acute diseases. The disease prevailing, with the exception of a few cases, were of a chronic character and the prisoners were afflicted with them long before entering prison. These cases remain considerable time in hospital and require special diet and care. They are not amenable to any medicinal treatment and generally regain fair health by supporting regimen. Few cases of tuberculosis were under treatment, there being a greater freedom from that disease during the past than any previous year. The liability to take on the disease after *la grippe* seems apparent. Owing to building operations catarrhal affections prevailed, which may be accounted for not only by the irritation of the dust, but by the connection aerial germs in the form of dust have with common forms of disease.

Sanitation demands that we wage a continuous warfare against all disease, thus, besides a condition of cleanliness, we employ the means which have been devised for destroying the very germs of disease or so inhibiting their action, as to render them incapable of giving rise to infection or disease. The agents employed to bring about this condition are disinfectants or antiseptics whose known action on micro-organisms harmonize with the present advancement of science, and contributes to promoting the duration of life. As in former years, and as must be inevitable, a contingent of old and decrepit men, some with one foot in the grave, and also juvenile criminals of low mental calibre, are sent to prison, whilst they are properly subjects for sympathy and assistance. If one desired to confer a lasting benefit on this class of individuals it would be easy to find scope for his charitable benefactions.

As might be expected many prisoners suffer from a condition of sleeplessness owing to the thoughts over their lot, and frequently it is the cause of slight mental aberration. They do not obtain the relief from the strain of conscious being. This mental condition is of brief duration, generally till they become accustomed to their new surroundings.

The personal cleanliness of the prisoners is a matter of congratulation, and their clothing has been selected with a view to health and season.

The ventilation in the various industrial shops and in the dormitories has been satisfactory during the year; the general prison has been kept clean, and the painting and whitewashing which are an annual duty have not been neglected. The heating of the prison has given every satisfaction and the maintaining of a proper temperature in the cold season, in the different shops and other buildings, has contributed to the prevention of sickness and to the alleviation of those suffering from slight ailments.

The bread furnished has borne its reputation as the genuine article, and altogether, the food supplied has been up to the usual standard.

There have been only two accidents during the year. One prisoner doing work in the dome fell and was killed, the coroners jury finding that every precaution was taken to ensure his safety. One prisoner was injured by his own carelessness by coming too near a delayed fuse in blasting operations.

I have to record one suicide during the year. When one takes up the daily paper and notes the number of suicides recorded in different parts, this is a good record, for it is natural to suppose that suicides would be more frequent in prison, the prisoner seeking in death a refuge from misery, shame and dishonour. There is no preventative against

4-5 EDWARD VII., A. 1905

it, as one bent on self-destruction can do so despite every precaution and in the most public place.

The hospital has been kept clean and well ventilated and always ready for the reception of any who required hospital care.

As must be always expected, there was considerable sickness amongst the officers during the year, and it was of such a character as necessitated frequent and in many cases, prolonged absence from duty. The character of their work, the irregular hours, the extremes of temperature incurred in passing from a warm shop or building into the cold air, and the constant vigilance and mental strain incident to their duty are all contributory to lessening the resistance of the system to the invasion of disease. Of the ninety officers in the prison few escaped being laid up at some time during the year. In their case it has not been a desire for a healthful rest, for I have yet to see in an officer a semblance of shrinking from duty except under the plea of genuine invalidism. My experience has been, and I am pleased to be able to state it, that a constant devotion to duty has been always manifested by the express desire to return to it, often when unable to perform it; and in many instances when officers returned to duty without permission, and before being entirely convalescent, they were obliged to return home again and remain till well. There is a misleading feeling of strength in one who is recovering from disease, when if the patient be not prevented, he will undo his recovery by rashly exposing himself to danger.

Guard Hamilton who was on night duty fell and fractured his leg. He was brought to his home where I adjusted it. This necessitated a prolonged absence from duty and constant attention.

Guard Weir was unfortunate enough to fall one evening and fracture four of his ribs. He was driven to his home where I attended to his injuries. Both these officers are now as well as ever they were.

The number of cases of sick officers during the year was 116; the number of prescriptions written for them was 891. To these sick officers I made 842 day visits and 44 night visits at their homes, which are distributed all over the city, principally to the suburbs and in the villages of Portsmouth and Williamsville. Besides the regular daily morning visit to the prison, I paid 54 extra visits and 16 night visits, and was called twice in case of accidents.

Insane Ward.—This ward has been thoroughly renovated during the year and is always kept scrupulously clean and in good order. The sanitary appointments are such as to reflect credit on the department and the heating has given every satisfaction. The inmates are kept clean in their person and clothing and mostly all of them are engaged in the performance of some work for the internal arrangement of the ward. On my visit to the ward each day the mental health of each one is observed, and any one who has recovered is discharged into the general prison to resume his regular work. During the year 11 were restored to their usual mental condition and on being discharged made themselves useful in the general prison industries. It must be admitted that on the borderland of recovery it is sometimes impossible to state accurately when absolute mental health has been restored, and as proof of this it is admitted that the reported cures which decorate the records of institutions for insane, are frequently merely intermissions, be they of long or short duration, in their mental condition. As usual there have been many attempts at feigning insanity but a brief period of observation always serves to detect the malingerer. A few suffered from intercurrent diseases, but they were transferred to the regular hospital for treatment till recovered. The volumes of literature on insanity all show it to be on the increase and they also show that medical science has not yet discovered any specific for its cure, because the pathological processes underlying it are generally unknown. For this reason asylums all over the country are full of inmates, incurables, who under the charge of guards or attendants, receive the usual domiciliary treatment of housing, clothing, and feeding. The number of inmates in the ward at end of year was 36; admitted during the year 28; admitted from this prison 20; transferred to provincial asylums on expiration of sentence 3; discharged cured 11; improved to resume work 7.

SESSIONAL PAPER No. 34

Prison of Isolation.—The ward contains the penal class, all of whom were in good health at the end of the fiscal year. Very little sickness occurs here as the ward is kept very clean, warm and well ventilated. Suitable employment is given the inmates and they appear to be a healthy class. All those discharged from the ward were in good health at the time. There was no case of diseased mental condition noticeable amongst the inmates.

Female prison.—At end of year 11 inmates were in this ward. With the exception of one prisoner who suffered from cancer of stomach and who was discharged from prison, there was a comparative freedom from disease. The wards are kept clean and sanitary and the prisoners are always clean and neatly dressed. The matron merits a word of encouragement for the care bestowed upon the ward and its occupants.

Prescriptions.—The number of prescriptions dispensed during the year independent of hospital patients, amounted to: For officers, 891; prison of isolation, 181; insane ward, 196; female prison, 287; dispensary patients, 4,508; number of teeth extracted, 148; number of days in hospital, 3,949.

If there is one function which a report has, it is certainly the opportunity it affords of expressing thanks which are due. I therefore desire to say, that I feel greatly indebted to the officers of this institution for their hearty co-operation in the work of this department, and ask a continuance of their confidence and support. The hospital overseer, Mr. Gunn, faithfully discharged his duty and merits special mention.

ST. VINCENT DE PAUL.

St. VINCENT DE PAUL, July 1, 1904.

The Inspectors of Penitentiaries,
Ottawa.

SIRS,—I have the honour to submit you my annual report for the year 1903-1904. Nothing very particular occurred in my department though, I remark that I had to treat in the hospital more patients than in the previous years. The great majority of them were affected with no very serious disease.

Many officers too, had to suspend their duty owing to illness. This year as in the past years, I noticed that all the cells and walls were whitewashed or painted which by their cleanliness gives more comfort to the convicts.

We had this year no serious accident. I had to attend a few cases of light importance as, amputation of a finger &c. . . . Just one patient made me anxious, namely, keeper Blondin who was nearly killed by two convicts. During two days, that he

SESSIONAL PAPER No. 34

was unconscious, the least complication would have proved fatal. Fortunately he had none.

Last December about 30 convicts were transferred here from Stony Mountain penitentiary. Though all were very tired, they reached this institution in perfect health. Their hands and feet were slightly swollen but none of them were really sick. I have noticed very frequently that many convicts are affected with syphilis or tuberculosis, when brought in. In presence of such a danger of contagion or infection, by so virulent diseases, I would suggest that the use of the razor be left aside, and the clipper be substituted. All danger of inoculation would disappear then, and we would not treat so many cases of skin diseases with so much difficulty. The food distributed to convicts, meat, vegetables and bread, is of very good quality and given in sufficient quantity,

During the year 3,988 consultations were given to officers and convicts, and 43 patients were attended in the hospital.

DEATHS.

Pierre Richard, anthrax in the face ; cause of death, meningitis.

Joseph Young, pulmonary tuberculosis.

A few convicts had to be transferred in Kingston penitentiary, being insane : Bernard McClanagan, Bert Williams, Emmanuel Provost.

We cannot keep insane convicts here as we have no proper cells for them, and moreover they are a continuous danger to themselves and their neighbours.

Very respectfully submitted,

AD. ALLAIRE, M. D.
Surgeon.

MANITOBA.

STONY MOUNTAIN, August 27, 1904.

The Inspectors of Penitentiaries,
Ottawa.

SIRS,—I have the honour to submit my annual report for the year ending June 30 1904.

The general health of the convicts has been good during the year. Digestive troubles, colds and throat affections have been the most frequent complaints. I have to report two deaths, both due to tuberculosis, one being an Indian. One convict became insane and was transferred to Kingston.

Thirty-four patients were treated in hospital.

Two thousand three hundred and nine prescriptions were dispensed to convicts treated in cells.

Two hundred and ninety-four days were lost by officers to sickness, mostly from minor complaints.

The usual statements are appended.

I have the honour to be, sirs,
Your obedient servant,

R. W. NEILL, M.D.

APPENDIX C

CHAPLAINS' REPORTS

KINGSTON.

KINGSTON, July 1, 1904.

J. M. PLATT, Esq.,
Warden.

SIR,—I beg herewith to submit my report as Protestant Chaplain for the year ended June 30, 1904.

At that date there were under my charge 285 prisoners, of which 5 were females, who in regard to their religious belief are classed as follows :

Church of England.....	105
Methodist.....	89
Presbyterian.....	51
Baptist.....	22
Lutheran.....	10
Jews.....	3
Quakers.....	1
Latter Day Saints.....	1
Unitarian.....	1
Congregationalist.....	1
Salvation Army.....	1
Total.....	285

During the year six have died and one was transferred to the Roman Catholic chapel.

The sick have been regularly visited and the ministrations of the chaplain have been gratefully received. Cases of sickness have been comparatively few, owing, no doubt, to the healthy condition of the prison. A better record, perhaps, in this respect, could not be shown by any institution of like nature in this, or any other country.

The services on Sundays and holidays have been regularly held, and have always been most orderly, and the attention and general behaviour of the men most encouraging. In fact in this regard, many a congregation outside might learn a lesson from their example. The choir take a real interest in their work and do their best, and the singing is hearty and devotional.

Communicant classes were held three times a week for about a month before each of the three great festivals, and unflagging attention was paid to the lectures. About fifty partook on each occasion.

The new chancel railing greatly improves the appearance of that part of the chapel. It is earnestly desired that the partition dividing the chapel from the school room and which fell down last winter, will soon be replaced, as the want of it causes much inconvenience and discomfort in connection with the day school and choir practice and Sunday services.

I hereby desire thankfully to acknowledge the unfailing kindness and courtesy shown to me by yourself and all the officials whenever I have sought their advice and direction, and, on all occasions.

I have the honour to be, sir,
Your obedient servant,

A. W. COOKE,
Protestant Chaplain.

4-5 EDWARD VII., A. 1905

PORTSMOUTH, July 1, 1904.

The Inspectors of Penitentiaries, Ottawa.

SIRS,—The wheels of time have once again made their annual revolution, and remind me of the fact, that the hour has come to hand for the making of my yearly report.

At this date I have entered on the prison chapel register the names of 157 men and 6 women, being an increase, I am sorry to say, of 11 on the whole over last year's count.

On Sunday, October 18, 1903, we had the pleasure of a visit from His Grace Archbishop Gauthier, who came for the purpose of administering the Sacrament of Confirmation to ten candidates who had been duly prepared for its reception. He addressed them both in English and French, delivering a telling instruction of an hour's length and expressed his very great delight at their reverent demeanour throughout the whole ceremony. Be it said to the credit of the men, that I find them at all times attentive and respectful ; and the majority of them manifest a great eagerness to profit by the instructions and religious services of Sundays and holidays throughout the year.

The supervision and active interest of the keepers and guards in the chapel leave nothing on their part to be desired, and therefore I avail myself of this opportunity to tender to them as also to all the officers of the institution my heartfelt appreciation of their daily acts of kindness to me.

Yours respectfully,

M. McDONALD,
Roman Catholic Chaplain.

ST. VINCENT DE PAUL.

ST. VINCENT DE PAUL, June 30, 1904.

To the Inspectors of Penitentiaries, Ottawa, Ont.

SIRS,—Allow me to present my annual report for the fiscal year ending to-day.

The conduct of our men in the chapel is excellent and the discharge of religious duties very satisfactory.

The Catholic choir has displayed increasing zeal and ability, which is a notable extent, due to the generous help of our present organist.

The school and library are more and more useful to our men, who appreciate better the books selected for them and yield more sensibly to the advice and direction of our school-instructor.

The kindness of all our officers proves constant, if not increasing, so that I fulfil a duty in expressing here my gratitude to them all.

At the beginning of the year there were 279 under my care. To-day 192 join the services of the Roman Catholic chapel

During the year, 125 have arrived, one of them from the Protestant chapel ; 110 have parted with us, out of this number, one for another world, one transferred to the Protestant chapel, 7 to Kingston penitentiary, 5 have been pardoned, 23 liberated and one made his escape.

SESSIONAL PAPER No. 34

Besides the ever-increasing craving for liquor, the chief cause of so many down falls ending here is the general suggestion hypnotizing youth and originating in the numberless examples of lawless ambition, rash cupidity and daring scorn of all justice, divine or human.

Thence is the moral sense rapidly quenched, and hope should be given up were it not for the rush of Divine mercy, of which the knowledge is kindled and the need reminded everywhere, but particularly in prisons, by the spiritual attendance of the priest as 'dispenser of the mysteries of God', I Cor. c. IV, v. I.

Let me, dear sirs, offer you my deep and sincere gratitude for your constant help and kindness to me and

Respectfully subscribe,

L. O. HAREL, Priest,
R. C. Chaplain.

ST. VINCENT DE PAUL, July 1, 1904.

To the Inspectors of Penitentiaries, Ottawa.

SIRS,—I have the honour of submitting my annual report as the Protestant chaplain of this penitentiary, for the fiscal year ending June 30, 1904.

A glance at the subjoined figures will show a considerable increase in our numbers over those of last year.

On June 30, 1903, the names on my register numbered 53, while on the same date this year there are 70.

This, however, is explained by the fact that 16 convicts were, during the year, transferred hither, from another penitentiary, otherwise the increase would have been 'one.'

One of those under my care died during the year, and was temporarily laid to rest in a convenient place, outside the walls, until the new burial ground, which has since been selected and which I hope shortly to see levelled and inclosed, shall be made ready.

The Sunday, and week-day services in the chapel have been regular and uninterrupted; and the behaviour of the men attending, with few exceptions, quiet and attentive.

One of the men plays the organ at the week-day services, thus making them brighter and the singing heartier.

Several slight changes and improvements have been made in the chapel, while I have to acknowledge, with thanks, the addition of a wardrobe to the furniture of the vestry.

The school under Mr. Dorais is doing a good work. I do all I can to persuade those who are not able to read to attend the school, and thereby gain the means of greatly enlarging the mental horizon.

I hope yet to see the day when all inmates of the penitentiaries who are unable to read shall be required to attend the school until they have mastered that accomplishment or demonstrated their inability to do so.

The library is both a boon to the men and also a valuable aid in maintaining order and quietness.

It might also become a greater agency in promoting the moral and spiritual welfare of the convicts if the chaplains were allowed a little more latitude in outlay of the funds provided for its maintenance.

I must not omit bringing to your notice the good work done by the 'Prisoners Aid Association of Montreal' a purely voluntary organization, receiving no government aid, but depending for its support on the generosity of those in sympathy with its object, i. e. to give the newly discharged prisoner a chance to 'start straight.' During the year a number of our late inmates have been assisted in getting work, provided with meals and shelter while seeking employment, given pecuniary assistance to

4-5 EDWARD VII., A. 1905

reach their homes, and in several cases given good warm overcoats to protect them from the severity of our winter weather, and, in addition to all this, kindly words of counsel and advice are ever ready for those ‘who have ears to hear.’

I desire before concluding to express my great appreciation of the kind and courteous assistance, in the performance of my duties of chaplain, which I have received from the warden, the deputy warden and the officers generally.

I have the honour to be, sirs,
Your most obediently,

J. ROLLIT,
Protestant Chaplain.

J. ROLLIT,
Protestant Chaplain.

DORCHESTER,

DORCHESTER, N. B., July 1, 1904.

SIRS,—I have the honour to present my twenty-first annual report as Protestant chaplain of the penitentiary for the year ending June 30, 1904.

On that day there were under my charge 138 prisoners, of whom eight were women, as against a total of 142 for the corresponding day of the preceding year.

In last year's report, I said that we had reached a mark not previously touched and I regret to report a very slight decrease in numbers.

Yet I will not be pessimistic nor do I consider there is ground for pessimism, although with a falling census barometer it would be pleasant to find the criminal barometer answerable thereto.

The Dominion census of 1891 showed a total population in the three maritime provinces of 893,959, whilst that of 1901 shows 880,737, a decrease of 13,222. This is not as maritime provincial people would like to have it, still less do the criminal statistics of the last decade inspire us with cheerfulness.

My annual numerical reports of Protestant prisoners for the last ten years are as follows :—

1895.....	100
1896.....	117
1897.....	114
1898.....	114
1899.....	131
1900.....	115
1901.....	105
1902.....	121
1903.....	142
1904.....	138

I am pleased to be able to say that this is the first year in which I have not been called upon to register a death ; nor at the time of writing have I a single convict in the hospital.

The uniformly reverent attention that is given by the convicts to all that is said and done in the chapel services fills me with cheerful hope.

The choir continues to be very helpful in divine service ; and as it is well understood among the prisoners that misconduct disqualifies for that honourable service, I have nothing but good words for them.

I am glad to be able to report unflagging interest in my weekly bible class. To have seventy men attending voluntarily to hear the word of God read and explained is at once an inspiration and a great responsibility.

On Sunday, May 16, 1904, by the permission of the minister of justice, Major Archibald, of the Salvation Army, addressed the prisoners under my charge. I hope that old and familiar truths daily taught the prisoners received a fresh impulse and deepened impression from being uttered by a new voice.

Harking back for a moment to my addendum report of last year. I do not suppose that it will have any great effect. But I may say that in the course of conversation with persons of weight and influence who more or less are concerned with administration of justice, that they entirely concurred in the view therein expressed events I have the consciousness of having said what I thought I ought to say.

I may add that the class of crimes therein referred to has, with one exception, been conspicuously absent during the year past.

4-5 EDWARD VII., A. 1905

With something like an air of repetition—although of so a desirable sort—I have to express my indebtedness for assistance to every member of the staff from the warden down; they are all fellow-helpers.

The following table shows the religious preferences of the 138 convicts under my charge on June 30, 1904 :—

Church of England	56
Baptists	51
Presbyterians	14
Methodists	15
Unitarian	1
Adventist	1
Total	138

And I have the honour to be, sirs,
Your obedient servant.

J. ROY CAMPBELL, D.D.
Protestant Chaplain.

DORCHESTER, N. B., Oct. 1, 1904.

The Inspectors of Penitentiaries, Ottawa.

SIRS,—I again have the honour to submit to you my annual report as Roman Catholic chaplain of the penitentiary for the fiscal year 1903-4.

On June 30 last, I had figuring on my prison book 109 males and 3 females, a grand total of 112 the largest number yet on my register.

In all things pertaining to my office, I have but to reiterate my pleasure and appreciation for the uniform courtesy extended to me by all, in the discharge of my duties of chaplain of this prison.

I have the honour to be, sirs,
Your humble servant,

A. D. CORMIER, Priest,
R. C. Chaplain.

MANITOBA.

STONY MOUNTAIN, July 27, 1904.

The Inspectors of Penitentiaries, Ottawa.

SIRS,—I have the honour to present my report for the year ending June 30, 1904, as follows :—

Presbyterian.	14	
Methodist.	17	
Lutheran	14	
Baptist.	7	
Mormons.	3	
Quakers	1	
Doukhobours.	5	
Total	103	
Intemperate.	57	
Temperate	36	
Moderate.	4	
Total abstainers.	6	
Total	103	

My work has been much the same as in the past. The men have been regularly visited in the hospital and prison and advised and urged to live a true Christian life. Divine service has been observed with the deepest solemnity. The great rush of population to our country has greatly increased our number of criminals and taxes us to the utmost to provide for them.

I must thank the warden and officers for the aid rendered me in the performance of my duties.

I have the honour to be, sirs, your obedient servant,

F. M. FINN,
Protestant Chaplain.

4-5 EDWARD VII., A. 1905

STONY MOUNTAIN, July 17, 1904.

The Inspectors of Penitentiaries, Ottawa.

SIRS,—I send my report for the year ended June 30 last.

Fifty-two convicts were under my charge at that date. These seem to be determined to do well, and their conduct in the chapel is good. May they persevere in these good dispositions.

I have the honour to be, sirs, your obedient servant,

G. CLOUTIER, *Priest,*
R. C. Chaplain.

BRITISH COLUMBIA.

NEW WESTMINSTER, July 16, 1904.

The Inspectors of Penitentiaries, Ottawa.

SIRS,—Owing to the comparatively recent date at which I entered upon my duties as Protestant chaplain of this penitentiary, my report must be brief.

At the close of the fiscal year, June 30, 1903, I find sixty-five convicts on my register.

There appears to be a keen interest manifested in the regular sunday service, the order maintained being excellent, and the singing hearty.

The individual work is here, as elsewhere, the telling work, and I noted with pleasure the willingness of the men to have heart to heart talks.

I recognize that to a large extent the success of my work is dependent upon the warden and his staff of officers, and I desire to thank them for courtesy extended to me in the discharge of my official duties.

I have the honour to be, sirs, your obedient servant,

ALBERT EDWARD VERT,
Protestant Chaplain.

NEW WESTMINSTER, B.C., June 30, 1904.

The Inspectors of Penitentiaries, Ottawa.

SIRS,—I beg to forward my report concerning the Roman Catholic chapel, for the fiscal year just ended.

There are forty-three convicts under my spiritual direction ; the majority is found very attentive during the services and instructions held on all Sundays and holidays throughout the year.

The library is well patronized and highly appreciated. The school under care of Mr. Carroll does a very good work.

My warmest thanks are heartily given to the warden and his staff officers for the aid rendered me in the discharge of my duties.

I have the honour to be, sirs, your obedient servant,

E. PEYTAVIN, O.M.I.,
R. C. Chaplain.

APPENDIX D

SCHOOL INSTRUCTORS' REPORTS

KINGSTON.

KINGSTON, July 2, 1904.

The Inspectors of Penitentiaries,
Ottawa.

SIRS,—I have the honour to submit my ninth annual report of the school in this penitentiary for the year ended June 30, 1904.

The total number enrolled during the year was 98. Of this number 40 passed out capable of reading and writing intelligently and with a fair knowledge of the elementary rules of arithmetic—23 retired owing to expiration of sentence and a few from lack of application.

The present attendance is 35 and the studies of these are divided as follows :—

Reading in Part I.....	8
“ II	7
Reading in 2nd book and writing.....	5
“ 3rd book, writing and arithmetic.....	15

The school has been conducted by Mr. Begg, assistant, in a most satisfactory manner. The pupils take a keen interest in their studies and show every desire to profit by the opportunities afforded them.

They are attentive and well behaved in the school-room and appreciate highly the instruction given in their respective cells during the evening.

I have the honour to be, sirs,
Your obedient servant,

W. A. GUNN,
School Instructor.

ST. VINCENT DE PAUL.

ST. VINCENT DE PAUL, July 30, 1904.

The Inspectors of Penitentiaries,
Ottawa, Ont.

SIRS,—I have the honour to submit to you my twenty-second report of the school and library of this institution for the year ended June 30, 1904.

The total number of convicts enrolled during the year was seventy-eight, and the average daily attendance was twenty-five.

At the close of the year the school register showed an attendance of twenty-eight pupils classified as follows :

Reading, dictation, arithmetic	16
Reading, spelling, writing, tables	7
Spelling, writing, mental arithmetic	5

Eight English pupils were in the Fasquelles French course, thirteen in the third French reader and seven in the French primers.

Seventy men were supplied with school books and slates to study in their cells.

The conduct and application were satisfactory.

The library is in good condition.

I tender my sincere thanks to my superiors for the assistance given me in the discharge of my duties.

I have the honour to be, sirs,
Your obedient servant,

J. T. DORAIS,
School Instructor.

DORCHESTER, N. B., July 1, 1904.

The Inspector of Penitentiaries,
Ottawa.

SIRS,—I have the honour to submit my annual report of the school and library in this penitentiary for the year ended June 30, 1904.

At the beginning of the year the school was attended by thirty-six pupils.

The present attendance is thirty-two, divided as follows :—

Reading, writing and arithmetic.....	14
Reading and writing.....	8
Reading only.....	4
Learning French.....	6

Five were reading in the fifth English reader, four in the fourth, one in the third, eight in the second, four in the first, four in the primers, and six in the first French reader.

The conduct of the pupils and the progress made have been very satisfactory.

I beg to offer my thanks to my superiors for the help given me in the discharge of my duties.

I have the honour to be, sirs,
Your obedient servant.

G. B. PAPINEAU,
School Instructor.

MANITOBA.

STONY MOUNTAIN, August 30, -1904.

The Inspectors of Penitentiaries,
Ottawa.

SIRS,—I have the honour to submit my annual report of the school for the fiscal year ended June 30, 1904.

Twenty-nine convicts were enrolled during the year, classified as to nationality as follows: English, &c., 3, French 1, French half-breed 7, English half-breed 2, German 2, Galician 5, Hungarian 3, Dane 2, Indian 4.

Of the convicts enrolled, 13 had to learn the alphabet, 4 were put in the primer, 5 in the second reader, 4 in the third reader, and 3 in the third reader, spelling and arithmetic.

The average daily attendance was 15 nearly, and on the 30th of June it was 14, classified as follows: Primer, Part I, 3, Primer, Part II, 4, Second Reader 3, Third Reader 4.

I am pleased to report that the conduct of the pupils while at school was very good and the progress made by most of them was very satisfactory.

I beg to thank my superiors for the help given me in the discharge of my duty.

I have the honour to be, sirs,
Your obedient servant,

J. O BEAUPRE,
School Instructor.

		Stock on hand, June 30, 1904.....	7,474 61
	13,707 12		13,707 12

The cause of such a small profit is due to the fact that the piggery live stock was taken into the inventory for June 30, 1903, at the prevailing market price, which was very high, and this same stock was sold in 1904 at a less price than inventoried at, account market being very low.

J. A. McCAUGHERTY

Farm Instructor.

ST. VINCENT DE PAUL.

June 30, 1904.

The Inspectors of Penitentiaries,
Ottawa, Ont.

SIRS,—I have the honour to submit herewith farm statement for the year ending June 30, 1904.

Notwithstanding the long drought in the early part of the season the farm product was satisfactory, grain and root crops were good, excepting pease and onions which were a total failure owing to the dry weather.

Farm improvements were carried on in accordance with the amount of help that could be spared. Every effort should be made to put as much help on the farm as possible to carry on the drainage and other improvements. Delay in this respect will be a yearly loss of revenue.

The deficiency in barn room is evident. It is very difficult to handle a large crop with convict labour without the necessary storage space for the produce.

I am, sirs,
Yours respectfully,

EDW. KENNY,
Farm Instructor.

DORCHESTER.

DORCHESTER, N.B., July 1, 1904.

The Inspectors of Penitentiaries,
Ottawa.

SIRS,—I have the honour to submit herewith the annual report of the operations upon the farm for the year ending June 30, 1904.

The season was dry for heavy crops.

The hay crop was light on marsh and upland, but well saved.

Oats yielded 53 $\frac{3}{8}$ bush. per acre ; barley 39 bush. per acre, buckwheat 10 bush, per acre. Roots were a fair yield and kept well.

The following shows the quantity and value of the farm products :—

261 tons English hay at \$8	\$2,088 00
70 " broadleaf hay at \$5	350 00
75 " ensilage at \$2.50	187 50
2,350 bush. oats at 48c.....	1,128 00
322 " barley at 60c.....	193 20
90 " buckwheat at 50c.....	45 00
3,721 " turnips at 20c.....	744 20
3,866 " potatoes at 30c.....	1,159 80
338 " mangolds at 25c.....	84 50
177 " red carrots at 30c.....	53 10
75 " red beets at 30c.....	22 50
13 " parsnips at 30c.....	3 90
88 " white carrots at 30c.....	26 40

4-5 EDWARD VII., A. 1905

2,288 lbs.	pork at 7c per lb.....	\$ 160 16
4,343 "	pork at 6c per lb.....	260 58
10,327 "	beef at \$5.49 per cwt.....	566 95
408 "	beef at \$6.00 per cwt.....	24 48
		<hr/>
		\$7,098 27

We have on hand 151 head of cattle and 12 horses. Our stock of pigs number 64. In my report last year I referred to the necessity of a shed to protect the manure from the weather. As yet none has been provided, and a considerable loss is occasioned in this way. 88 acres are in grain and roots crop. Weather is very dry and a continuation of it will cause a light crop in hay, grain and roots. 8 acres of new land has been cleared, ploughed and sowed.

I have the honour to be, sirs,
Your obedient servant,

A. T. HICKS,
Farm Instructor.

A. T. HICKS,
Farm Instructor.

MANITOBA.

STONY MOUNTAIN, JULY 11, 1904.

Inspectors of Penitentiaries,
Ottawa.

SIRS:—I have the honour to submit herewith the annual farm statements for the year ending June 30, 1904. The farm comprises about 330 acres under cultivation, of which about 210 acres are under grain and roots, the balance hay and summerfallow. Our crops are looking well except in a couple of very low spots where the water has damaged them.

I have the honour to be, sirs,
Your obedient servant,

W. R. GRAHAME,
Farm Instructor.

BRITISH COLUMBIA.

NEW WESTMINSTER, Nov. 26, 1904.

Inspectors of Penitentiaries,
Ottawa, Ont.

SIRS,—I have the honour to herewith submit my report for the year ended June 30, 1904.

The farm work for this year was fairly satisfactory, but as the summer was wet and cold the yield of potatoes was considerably smaller than in former years.

Other crops, however, did not suffer and the harvest in these lines was very satisfactory.

The hay crop was heavy and was saved in very good condition. We have discontinued the raising of sheep and have gone more fully into the raising of pigs as we found it more profitable.

SESSIONAL PAPER No. 34

This spring, the outlook is more favourable. The weather is good, and should it continue so, and not too dry, good crops will be returned.

I have the honour to be, sirs,
Your obedient servant,

JNO. McNIVEN,
Farm Instructor.

APPENDIX M

REGINA JAIL REPORTS

REGINA JAIL

REGINA, N.W.T., August 22, 1904.

The Inspectors of Penitentiaries,
Ottawa.

SIRS,—I have the honour to submit the annual report for last fiscal year together with the usual statements.

I have much pleasure in recording a visit from Inspector Dawson during the year and wish that circumstances would admit of more frequent visits from him.

The past year, particularly the last eight months, has been the busiest in the history of this institution.

During the year we received 6 lunatics, 48 prisoners awaiting trial and 80 convicts, making a total of 134. The population has gradually increased from 15 at beginning of year to 37 on June 30, being three more than our cell accommodation which we had increased during the year from 28 to 34. Six more iron barriers have been ordered from Kingston and the cell accommodation will again be increased as soon as they arrive and can be built in. This will raise the cell accommodation to 40 which will be the limit of the capacity of the present building.

Owing to the overcrowded state of the jail, seven of the convicts were transferred to Prince Albert jail on January 29 last.

There can be no doubt that the accommodation of this jail, will have to be largely increased in the near future. At the present moment we have 45 prisoners on hand with every indication that we will have more. This will necessitate having a large number loose in corridors which is a constant source of worry to say nothing of the general untidyness and laxity of discipline which it causes.

The new hot water heating system was in operation last winter and was a great improvement on the old steam system.

The isolation hospital was finished in the early part of the year and we are now in a position to combat any contagious disease.

The replacing of our old steam heating system to which was connected a pump for supplying the prison with water from reservoir for washing &c., left us without water in the building, but arrangements were made with the C.P.R., and we connected with their water pipe, and now have an unlimited supply at the cost of only the pipe and material.

The farming operations were fairly successful as the farm account shows. Our root crop unfortunately proved a failure. This year we have five acres of roots, 30 acres of wheat, and 50 acres of oats under crop. We are gradually getting an adequate equipment, a binder and seed drill being added to the implements during the year.

I feel that considerable credit is due the officers of this prison for their carefulness and watchfulness in that I am able to report that there was no attempt to escape made during the year.

In conclusion I beg to thank you for the promptitude with which you have always attended to my communications and assisted me.

I have the honour to be, sirs,
Your obedient servant,

J. G. BLACK,
Jailer.

SURGEON'S REPORT.

REGINA, N.W.T., August 23, 1904.

To the Inspectors of Penitentiaries,
Ottawa.

SIRS,—I have the honour to submit my report of the medical department of the Regina jail, for the year ended June 30, 1904.

The health of the prisoners during the past year has been quite up to the average. There has not been any serious outbreak with the exception of a period during the winter months when there were a great many prisoners who had been committed for trial. Owing to the overcrowded condition and inadequate ventilation an epidemic of 'sore throat' occurred, but quickly subsided when the overcrowding was relieved.

The health of the officers has been unusually good. I brought the matter of improved ventilation to Inspector Dawson's attention during his recent visit to Regina and would again respectfully urge that something be done in this direction. At present during the warm weather, when windows may be opened the foulness of the air is very marked when all the prisoners are inside. This is sure to be very much increased during the winter months if the present overcrowded condition continues and is almost certain to be attended by outbreak of sore throat or some more serious disease.

A statement of the number of cases treated and of the drugs on hand is appended. The number of visits required to be made to prisoners during the year was, two hundred and nine, number of visits to officers twenty.

I have the honour to be, sirs,
Your obedient servant,

DAVID LOW, M.D.,
Surgeon.

APPENDIX N

PRINCE ALBERT JAIL

JAILER'S REPORT.

PRINCE ALBERT, N. W. T., July 6, 1904.

The Inspectors of Penitentiaries,
Ottawa.

SIRS,—I have the honour to submit my annual report together with sundry returns for the fiscal year ended June 30, 1904.

There has been no death or escape during the year. Three prisoners attempted to escape but were recaptured. The facts were reported to you at the time.

The daily average during the year was 13·66. The net per capita cost has been greatly reduced. This year the cost is \$540, or one half of that of last year. We have had a large amount of expenditure this year in construction work, about \$800 worth of materials being purchased for the new cell wing, \$550 for windmill and fittings, and \$200 for a horse, a total of \$1,550. These items added about \$113 to the per capita cost.

During the year a considerable amount of work has been done by the prisoners, including 2,500 feet of pipe laid to the river at an average depth of 8 feet, about 25 cords of stone hauled from the river and dressed and worked into blocks for building materials, and 12 acres of the new farm lands brushed out and ploughed,

I have on hand a quantity of good limestone, and will start the kiln in a few days.

The prison is greatly overcrowded. We have 20 cells and have 27 prisoners. I am pleased that you have instructed me to go on with the erection of the new cell wing, as this will give additional accommodation for 24 prisoners, a ward for insane persons, 2 dark cells, and a work room that will be used as a drying room for prison clothing during the winter months. The labour required to build the new wing will be supplied by the prisoners.

The plans have been received for the proposed hospital chapel and work room for the female prisoners. This improvement being entirely inside work will furnish employment for the prisoners during the coming winter, and when finished will add greatly to the convenience of the prison.

The windmill and pump is giving good satisfaction, and furnishes the prison with an unlimited supply of good pure water direct from the river.

Last season we had a good crop of vegetables and a fair crop of sheaf oats on the farm. Before any more land can be put in crop the farm will require to be fenced.

The prisoners, besides being engaged on the above-mentioned works, have been employed in sawing wood, gardening and making necessary repairs to the prison building.

The Salvation Army hold regular services in the prison every Sabbath morning at 9.30 o'clock. Occasional Sunday services are held by the Rev. Father Sinnet. All prisoners are invited to attend these services.

The conduct of the prisoners has been good. Early this spring we were favoured with a visit from Mr. G. W. Dawson, inspector of penitentiaries. We are always pleased to have Mr. Dawson visit the prison, as beneficial and practical results always follow such visits.

Thanking you for your courteous and prompt attention to all matters referred to you during the past year.

I have the honour to be, sirs,
Your obedient servant.

F. W. KERR,
Jailer.

SURGEON'S REPORT.

PRINCE ALBERT, June 30, 1904.

The Inspectors of Penitentiaries,
Ottawa.

SIRS,—I have the honour to submit my annual report for the year ending June 30, 1904.

Considering the large number of prisoners the jail this year contained, their health has been good.

I regret that no hospital accommodation has been supplied as yet.

A proper cell and appliances for restraining insane prisoners are urgently needed.

I am, sirs,
Yours obediently

H. A. LESTOCK REID
Jail Surgeon.

SESSIONAL PAPER No. 34

MATRON'S REPORT.

PRINCE ALBERT, July 6, 1904.

The Inspectors of Penitentiaries,
Ottawa.

SIRS,—I have the honour to submit my annual report for the fiscal year ended June 30, 1904.

The following is a statement regarding the female prisoners under my charge during that period :—

In custody, midnight June 30, 1904	1	
Received since	19	
	—	20
<i>Discharged since—</i>		
By expiration of sentence	13	
Pardon	1	
		14
	—	
Remaining at midnight June 30, 1904		6

The conduct of these prisoners has been very good. They were engaged at various works, such as making female prisoners clothing, mending, washing, scrubbing and general prison work.

I have the honour to be, sirs,
Your obedient servant,

ELLEN KERR,
Matron.

FARM REPORT.

PRINCE ALBERT, N.W.T., July 6, 1904.

The Inspectors of Penitentiaries,
Ottawa.

SIRS,—I have the honour to submit my annual report for the year ended June 30, 1904.

The root crop grown on the farm during the year was good. Vegetables to the value of \$109.95 were grown.

The 12 acres under cultivation was sown to oats and a fair crop realized. The oats were cut green and fed to the prison horses.

This year the land has again been sown to oats and the crop looks very promising.

The balance of the farm lands should be fenced in, 12 acres have been brushed out and broken up, but this cannot be brought under cultivation until, it is fenced.

I have the honour to be, sirs,
Your obedient servant,

F. W. KERR,
Jailer.
